Note of appreciation

Canada owes the success of its statistical system to a long standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

User information

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, from January 1995, Austria, Finland and Sweden; from May 2004, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovak Republic and Slovenia.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995 up to April 2004, the Czech Republic; from May 1996 up to April 2004, Hungary; from November 1996 up to April 2004, Poland; from December 1996, Republic of Korea; from January 2001 up to April 2004, the Slovak Republic; up to December 1994, Austria, Finland and Sweden.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

Foreword

About the figures

The series on international security transactions cover portfolio transactions in stocks, bonds and money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to nonresidents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks, bonds, and money market paper is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the free publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue no. 67-506-X).

Highlights

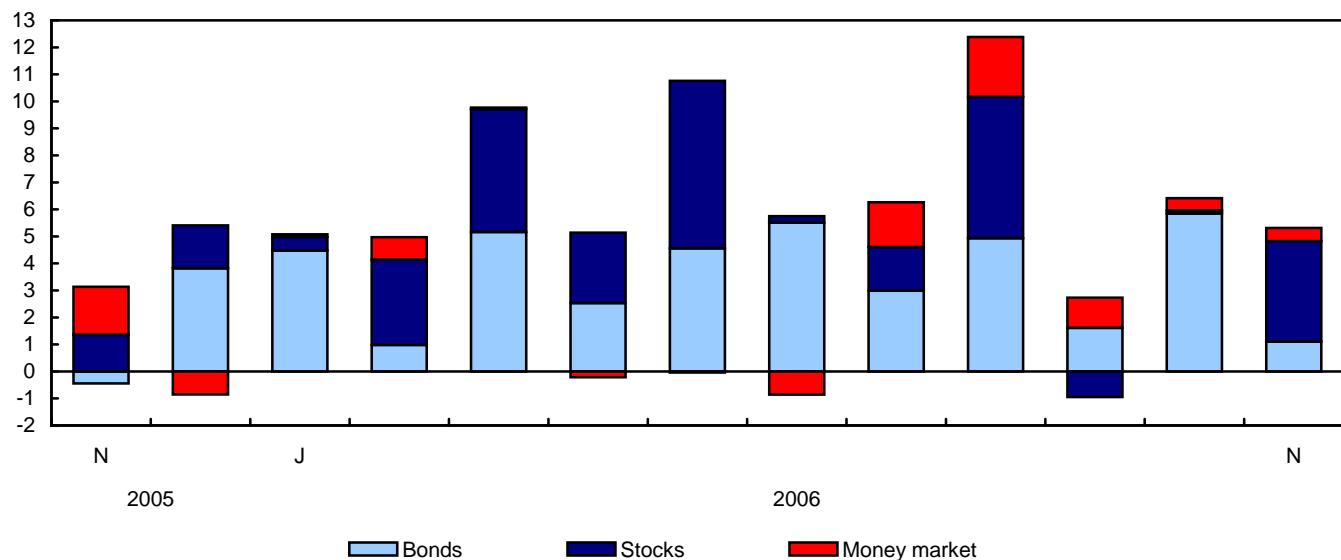

- Foreign investment in Canadian securities surged by \$11.0 billion in November, mostly going to bonds. Meanwhile, Canadians added \$5.3 billion worth of foreign securities to their investment portfolios over the month, with nearly three-quarters going to foreign stocks.

Analysis - November 2006

Foreign investment in Canadian securities surged by \$11.0 billion in November, mostly going to bonds. This pushed the year-to-date investment to \$28.9 billion just over the average for the last five years and easily surpassing the \$8.5 billion invested in 2005.

Chart 1
Canadian portfolio investment in foreign securities¹

billions of dollars

1. Reverse of balance of payments signs.

Meanwhile, Canadians added \$5.3 billion worth of foreign securities to their investment portfolios over the month, with nearly three-quarters going to foreign stocks. Canadian acquisitions of foreign securities have been strong since February 2005. Year-to-date investment has totaled a record \$72.5 billion for 2006.

Related market information

In November, the short-term **interest rates** in both Canada and the United States rose 2 basis points, to 4.18% and 4.94% respectively. The resulting differential of 0.76% remained unchanged from the month before.

Canadian long-term rates fell in November to 3.94% from 4.17% the month before and US rates dropped to 4.52% from 4.78% in October. This caused the differential between the two countries to narrow to 0.58%.

Canadian **stock prices** increased for a second consecutive month in November. The S&P/TSX Composite Index ended the month at 12,752.4, moving up 3.3% from October's close. Meanwhile, US stock prices, as measured by the Standard and Poor's Composite Index, rose 1.6%, closing November at 1,400.6.

The **Canadian dollar** slipped another 0.59 US cents in November and closed the month at 88.01 US cents.

Definitions

The data series on international security transactions cover portfolio transactions in stocks, bonds and money market instruments for both Canadian and foreign issues.

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to maturity of more than one year.

Money market instruments have an original term to maturity of one year or less.

Foreign investments in Canadian bonds soar

Building on October's \$2.1 billion purchase, non-residents invested a further \$11.3 billion in Canadian bonds in November, the second highest month on record. November saw the largest foreign purchases of net new issues (new issues less retirements) in Canadian bonds in two years, which accounted for two-thirds of November's investment.

Foreign acquisitions of Canadian bonds over the month were almost equally split between corporate bonds and government bonds. On a sector basis, the \$3.4 billion purchase of federal government bonds was all in outstanding issues. However, the investment of \$5.1 billion in corporate bonds and \$2.4 billion in provincial government bonds were mostly through new issues placed in foreign markets.

Geographically, European investors acquired a record \$4.9 billion worth of Canadian bonds in November, after buying \$3.4 billion worth the month before. American investors were a close second, buying \$4.3 billion worth in November.

On a currency basis, just over half (\$6.1 billion) were bonds denominated in foreign currencies. The \$5.2 billion of bonds denominated in Canadian-dollars were largely concentrated in outstanding issues.

Large sales of Canadian money market paper

November saw sizable sales of Canadian money market paper by non-residents, totalling \$1.7 billion. Overall, non-residents have bought \$3.4 billion worth so far in 2006, largely due to the record \$4.6 billion purchased in June.

On a sector basis, November's sell-off was focused on Canadian government t-bills and paper of federal enterprises, amounting to \$1.5 billion. Geographically, European investors accounted for 70% of all the Canadian money market paper divested in the month.

Buying of Canadian shares remains moderate

Non-residents acquired \$1.5 billion of Canadian stocks in November, with American investors buying \$3.2 billion worth, partially offset by a \$1.0 billion sell-off by European investors.

Overseas shares continue to attract Canadian investment

Following two quiet months, November saw Canadian investment in foreign stocks rebound to \$3.7 billion, mainly on the strength of purchases of overseas stocks (\$3.4 billion). Canadian investment of \$317 million in US shares rounded out the buying in November. Overseas mining, oil and gas extraction, banking, and insurance firms were top picks for the month. Canadian mutual funds and pension funds led all investors in November.

Acquisitions of foreign bonds soften

Investment in foreign bonds was significantly lower in November at \$1.1 billion, following the record purchase of \$5.8 billion in October. Nevertheless, purchases of foreign bonds have been strong over the past three years, particularly in 2006. The total purchases so far in 2006 have amounted to nearly \$40 billion, far surpassing the annual investment of \$27.6 billion over the record year of 2005.

Acquisitions of overseas bonds showed no sign of slowdown. Canadians bought \$2.8 billion worth over November, adding to the back-to-back record purchases totalling \$6.1 billion over the previous two months. Meanwhile, acquisitions of US corporate bonds remained robust at \$1.0 billion while Canadians sold off \$2.8 billion US government bonds.

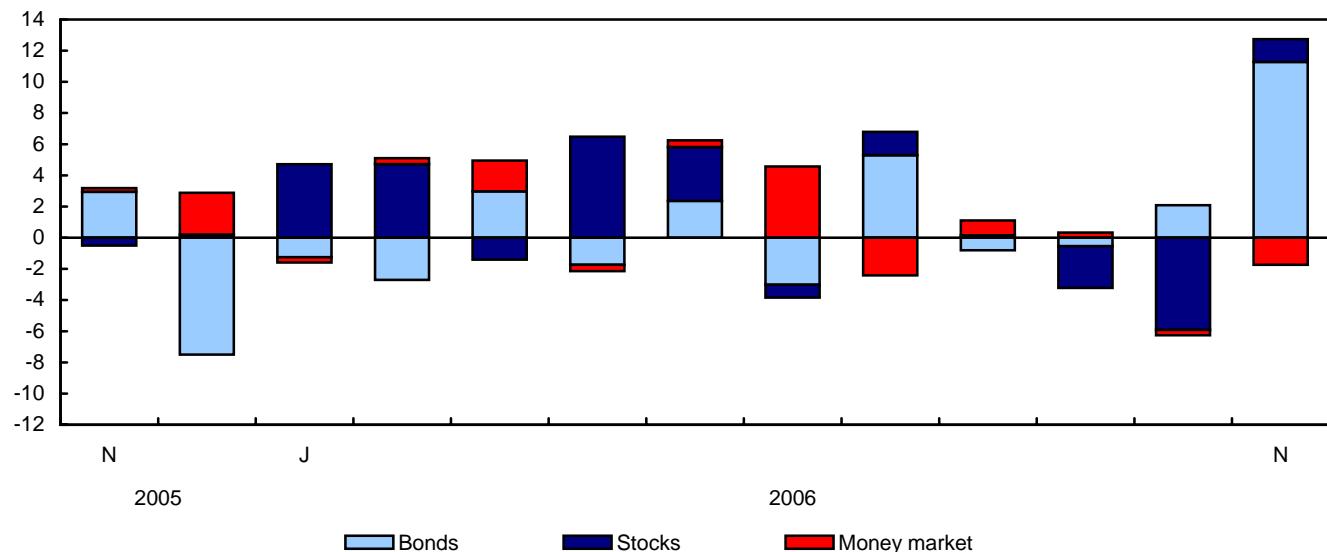

Canadians invested \$2.4 billion in maple bonds over the month. Those issued by US corporations totalled \$1.5 billion, nearly twice the amount issued by overseas issuers.

Investment in foreign money market paper continues

Residents bought \$496 million worth of foreign money market paper in November, up slightly from the \$457 million acquired in October. However, November's buying shifted from US corporate paper to overseas paper. Canadians have been buying overseas paper five months in a row totalling \$4.1 billion. November alone saw foreign investment of \$628 million worth in overseas paper.

1. Inclusive of new issues, retirements, trade in outstanding and change in interest payable or receivable.

2. Transactions in foreign money market securities are available from 2002 onwards.

Note(s): Throughout tables 1-14 a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada.
