Note of appreciation

Canada owes the success of its statistical system to a long standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

User information

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, from January 1995, Austria, Finland and Sweden; from May 2004, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovak Republic and Slovenia, and from January 2007, Bulgaria and Romania.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995 up to April 2004, the Czech Republic; from May 1996 up to April 2004, Hungary; from November 1996 up to April 2004, Poland; from December 1996, Republic of Korea; from January 2001 up to April 2004, the Slovak Republic; up to December 1994, Austria, Finland and Sweden.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

Foreword

About the figures

The series on international security transactions cover portfolio transactions in stocks, bonds and money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to nonresidents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks, bonds, and money market paper is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the free publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue no. 67-506-X).

Highlights

- Canadian investment in foreign securities continued to slow for the third consecutive month in July as residents acquired \$3.6 billion worth with nearly two-thirds in foreign stocks. Meanwhile, non-residents acquired \$1.5 billion worth of Canadian securities in July after divesting two months in a row.

Analysis - July 2007

Canadian investment in foreign securities continued to slow for the third consecutive month in July as residents acquired \$3.6 billion worth, down significantly from a near-record \$13.1 billion acquisition in April. Nearly two-thirds of July's investment was in foreign stocks while Canadian investment in long-term debt instruments was negligible in July after slowing down somewhat in June.

Chart 1
Canadian portfolio investment in foreign securities¹

billions of dollars

1. Reverse of balance of payments signs.

Meanwhile, non-residents acquired \$1.5 billion worth of Canadian securities in July after two consecutive months of divestment totalling \$6.7 billion. July's investment was mostly in Canadian shares as non-residents withdrew sizable amounts of Canadian money market instruments from their portfolios.

Canadians sell US government bonds and buy non-US bonds

Canadian investment in foreign bonds slowed significantly in July to \$259 million after 19 months of uninterrupted robust acquisitions averaging \$4.2 billion per month.

July's investment focus remained on non-US bonds as residents added \$2.5 billion worth, the 24th month of straight purchases, while selling \$2.2 billion worth of US bonds. The divestment in US bonds concentrated on government bonds, mainly on bonds with remaining term to maturity of less than 5 years or over 20 years. Meanwhile, Canadians acquired \$556 million worth of US corporate bonds, slowing from five consecutive months of strong investment averaging \$2.3 billion per month.

On a currency basis, Canadians acquired \$2.1 billion of Canadian dollar-denominated foreign bonds, more than offsetting the divestment in foreign bonds denominated in other currencies. Maple bonds issued by non-US entities continued to attract Canadian investors in July.

Related market information

In July, the differential between Canadian and US short-term **interest rates** widened in favour of investment in the United States. Canadian rates increased by 15 basis points to 4.57% as US rates increased 21 basis points to 4.82%.

Meanwhile, long-term rates in both Canada and the US declined. Canadian long-term rates dropped 4 basis points to 4.58%, moving to parity with Canadian short-term rates. US rates fell 17 basis points to 4.92%. The differential between Canadian and US long-term interest rates decreased to 0.34% in July from 0.47% the month before.

Stock prices in both Canada and the US continued to decline in July. The Standard and Poor's / Toronto Stock Exchange composite index edged down 0.3%, closing the month at 13,868.6. Meanwhile, US stock prices, measured by the Standard and Poor's Composite Index, fell 3.2% to 1,455.3.

After five consecutive months of increase, the **Canadian dollar** fell 0.12 US cents in July, ending the month at 93.74 US cents.

Definitions

The data series on international security transactions cover portfolio transactions in stocks, bonds and money market instruments for both Canadian and foreign issues.

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to maturity of more than one year.

Money market instruments have an original term to maturity of one year or less.

Resident investors favour non-US money market instruments

Canadians continued to invest in foreign money market paper in July, buying \$1.0 billion worth after acquiring \$2.2 billion in June. Investment in non-US paper amounted to \$1.3 billion, on par with the level of acquisition seen in June, and almost all in paper issued by non-financial firms.

Meanwhile, residents invested \$222 million worth in US treasury bills as interest rates on three-month t-bills continued to favour investment in the United States in July. They also disposed of \$521 million worth of US corporate paper, mainly paper issued by financial firms. On a currency basis, around 40% (\$417 million) of July's acquisition was Canadian dollar-denominated.

Strong investment in US shares continues

Following two months of lacklustre investment totalling \$723 million, acquisitions of foreign stocks picked up speed in July with Canadians buying \$2.3 billion worth. Investment in US stocks remained robust for a second consecutive month at \$1.7 billion in the context of declining stock prices in the United States and increasing uncertainties related to certain debt markets. Meanwhile, Canadians acquired \$580 million worth of non-US stocks in July, after divesting \$2.2 billion worth in June.

Small foreign investment in Canadian bonds

In July, non-residents invested \$345 million in Canadian bonds, switching from a sizable disposition of \$4.4 billion worth in June.

On a sector basis, July's foreign investment centred on Canadian corporate bonds and federal government enterprise bonds, totalling \$703 million and \$560 million respectively. Nevertheless, investment in both sectors declined significantly from June.

July saw non-residents acquire a nominal \$213 million worth of federal government bonds, swinging from a near-record disposition totalling \$5.5 billion in June. Investment was concentrated on bonds with remaining term to maturity of 5 to 10 years while non-residents sold a sizable amount of bonds maturing within 2 years or less.

On the other hand, non-residents continued to reduce their holdings of provincial government bonds, selling \$1.3 billion worth following June's disposition of \$2.4 billion worth.

On a currency basis, non-residents acquired \$801 million worth of Canadian dollar-denominated bonds, largely outstanding issues. Meanwhile, they disposed of \$451 million worth of Canadian bonds denominated in US dollars mainly due to bond retirements.

Non-residents switch to selling Canadian short-term instruments

In July, non-residents reduced \$1.3 billion worth of Canadian money market instruments from their holdings, largely offsetting the \$1.5 billion invested in June. Over three-quarters of July's divestment was in federal government treasury bills (\$1.0 billion).

Substantial foreign acquisition of outstanding Canadian shares

Foreign investors replenished their portfolios with Canadian shares in July, acquiring \$2.5 billion worth. Non-residents had previously divested \$2.9 billion and \$1.4 billion respectively in May and June, mainly due to sizable share retirements.

While retirements of Canadian shares continued to be important (\$853 million), July's investment was fuelled by a \$3.3 billion acquisition of outstanding shares. These were largely equities of Canadian firms that announced takeovers involving foreign investors but that had not yet closed.
