Note of appreciation

Canada owes the success of its statistical system to a long standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

User information

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, from January 1995, Austria, Finland and Sweden; from May 2004, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovakia and Slovenia, and from January 2007, Bulgaria and Romania.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995 up to April 2004, the Czech Republic; from May 1996 up to April 2004, Hungary; from November 1996 up to April 2004, Poland; from December 1996, Republic of Korea; from January 2001 up to April 2004, the Slovakia; up to December 1994, Austria, Finland and Sweden.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

Foreword

About the figures

The series on international security transactions cover portfolio transactions in stocks, bonds and money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to non-residents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks, bonds, and money market paper is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the free publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue no. 67-506-X).

Highlights

- Non-residents cut a sizeable amount of Canadian securities from their holdings in November, as they sold shares and significantly adjusted their holdings of debt instruments in favour of more liquid and short-term assets. For their part, Canadian investors continued to repatriate funds from foreign markets, though at a considerably slower pace than in October.

Analysis – November 2008

Non-residents cut a sizeable \$4.3 billion of Canadian securities from their holdings in November. Foreign holdings of Canadian shares were reduced as stock prices retreated 33% over the past three months. In addition, non-residents significantly adjusted their portfolio of Canadian debt instruments in favour of more liquid short-term assets.

Chart 1
Foreign portfolio investment in Canadian securities

For their part, Canadian investors continued to repatriate funds from foreign markets in November. Divestment in foreign securities slowed to \$2.6 billion from an all time peak of \$12.3 billion in October. Canadian investors made moderate acquisitions of foreign equities but continued to stay away from foreign debt instruments, in particular US government securities.

Non-residents move from Canadian bonds to money market instruments

Non-residents cut \$5.4 billion of Canadian bonds from their holdings in November, the largest disposal recorded since December 2005. Of this activity, two-thirds were net retirements of US dollar-denominated instruments, primarily federal government bonds. The remaining reduction was mainly attributable to secondary market sales of Canadian dollar-denominated bonds issued by the federal government and its enterprises.

Note to readers

All values in this release are net transactions unless otherwise stated.

The data series on international security transactions cover portfolio transactions in stocks, bonds and money market instruments for both Canadian and foreign issues.

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to maturity of more than one year.

Money market instruments have an original term to maturity of one year or less. Government of Canada paper includes treasury bills and US-dollar Canada bills.

However, foreign investors replenished their portfolios with Canadian short-term instruments. They added \$4.1 billion of these instruments in November, the largest investment since June 2006. Most of the foreign investment was in federal government paper, equally split between US and Canadian dollar-denominated instruments. In November, the net new issues of federal government paper remained on a par with the record activity set the month before.

Foreign investors sell Canadian shares as prices continue to decline

Non-residents divested \$3.0 billion of Canadian stocks, as prices dropped further and reached their lowest level in nearly four years. The Standard and Poor's / Toronto Stock Exchange composite index has fallen 33% since the end of August, led by declines of around 50% in the energy and information technology sectors. November's reduction in foreign holdings of Canadian shares applied to nearly all sectors of the Canadian economy.

Canadian investors continue to reduce their holdings of US debt instruments

Canadian investors continued to shed foreign debt instruments in November as they sold \$1.7 billion of bonds and \$2.0 billion of money market instruments. This marked the sixth consecutive monthly divestment in foreign debt instruments. Investors have removed \$14.8 billion of foreign bonds from their holdings over the last six months.

Chart 2
Canadian portfolio investment in foreign securities¹

billions of dollars

1. Reverse of balance of payments signs.

Overall, market conditions did not favour Canadian portfolio investment abroad. During the six-month period ending in November, the Canadian dollar fell 20% to 80.8 cents US. Meanwhile, Canadian short-term interest rates stood about 150 basis points above US rates in November, the largest gap posted since December 2003.

November's activity was mainly driven by the reduction in holdings of US government debt instruments. In particular, Canadian investors sold \$1.9 billion of US government bonds, principally the five-year benchmark bond. At the short-term end of the spectrum, investors sold \$2.2 billion worth of US Treasury bills as short-term interest rates in the US approached zero in November.

Investors did, however, make moderate acquisitions of US corporate debt securities, mainly US federal enterprise bonds offering attractive yields and money market paper issued by financial corporations.

Canadians resume acquisitions of foreign equities

Canadian investors resumed purchases of foreign shares in November. They acquired \$1.0 billion, focusing on a well-diversified basket of equities tracking major US market indexes. US stock prices, as measured by the Standard and Poor's composite index, have dropped 30% since the end of August.
