## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published
- \* significantly different from reference category ( $p < 0.05$ )

## Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, from January 1995, Austria, Finland and Sweden; from May 2004, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovakia and Slovenia, and from January 2007, Bulgaria and Romania.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995 up to April 2004, the Czech Republic; from May 1996 up to April 2004, Hungary; from November 1996 up to April 2004, Poland; from December 1996, Republic of Korea; from January 2001 up to April 2004, the Slovakia; up to December 1994, Austria, Finland and Sweden.

## The System of National Accounts

---

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

# Foreword

---

## About the figures

The series on international security transactions cover portfolio transactions in stocks, bonds and money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to non-residents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks, bonds, and money market paper is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the free publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue no. 67-506-X).

## Highlights

---

Foreign investment in Canadian securities increased to \$6.3 billion in March, with acquisitions equally split between bonds and stocks. In contrast, Canadians removed \$1.7 billion from their holdings of foreign securities in March, all debt instruments.

## Analysis – March 2011

Foreign investment in Canadian securities increased to \$6.3 billion in March, with acquisitions equally split between bonds and stocks. In contrast, Canadians removed \$1.7 billion from their holdings of foreign securities in March, all debt instruments.

**Chart 1**  
Foreign portfolio investment in Canadian securities

billions of dollars

### Foreign investors acquire Canadian bonds on the secondary market

Foreign investors added \$3.2 billion of Canadian bonds to their holdings in March. Foreign investment on the secondary market of \$8.0 billion was the largest amount since May 2010, and was concentrated in federal government and corporate bonds. This was partially offset by a record high in retirements of federal government enterprise bonds in the month.

Non-resident investment in federal government bonds rebounded to \$3.8 billion and was concentrated on medium term-to-maturity bonds, following significant activity in short-term bonds over the previous two months. Purchases of corporate bonds on the secondary market remained robust in March and were focused in Canadian mortgage backed securities.

### Note to readers

All values in this release are net transactions unless otherwise stated.

The data series on international security transactions cover portfolio transactions in stocks, bonds and money market instruments for both Canadian and foreign issues.

**Stocks** include common and preferred equities, as well as warrants.

**Debt securities** include bonds and money market instruments.

**Bonds** have an original term to maturity of more than one year.

**Money market instruments** have an original term to maturity of one year or less.

**Government of Canada paper** includes treasury bills and US-dollar Canada bills.

Non-resident investor holdings of Canadian money market instruments were down \$209 million in March. This resulted from sizeable retirements of provincial government paper, which more than offset foreign investment in new Canadian US dollar denominated corporate paper.

### Strong foreign acquisitions of Canadian equities continue

Foreign investors added a further \$3.3 billion of Canadian equities to their portfolio in March, with investment over the quarter reaching its highest level since the third quarter of 2009. Shares of Canadian financial and mining firms attracted the bulk of foreign investment in March. By month end, Canadian stock prices stood at levels last seen in the first half of 2008.

### Canadians reduce their holdings of US government debt securities

Canadian investors reduced their holdings of foreign bonds by \$2.3 billion in March, more than offsetting the acquisitions of the previous month. This activity was largely accounted for by US government short-term bonds. Resident investors also removed \$701 million from their holdings of foreign money market instruments in March. The divestment was all in US government T-bills and completely offset the investment accumulated over the previous two months. In March, US short-term interest rates fell to their lowest level in more than a year.

### Canadians acquire foreign stocks for a third straight month

Canadian investors added \$1.3 billion of foreign stocks to their holdings in March, a third consecutive monthly acquisition. This activity was almost equally split between US stocks and other foreign stocks. In March, US stock prices continued to rise and reached their highest level since May 2008, as Canadians favoured US funds tracking broad US equity market indices. Meanwhile, Canadian investment in non-US foreign equities was focused on European stocks and was led by Canadian pension funds.
