Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

User information

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published
- * significantly different from reference category ($p < 0.05$)

Data quality indicators

Data quality indicators are based on the coefficient of variation (CV). Quality indicators indicate the following: A - Excellent (CV between 0% and 4.99%); B - Very good (CV between 5% and 9.99%); C - Good (CV between 10% and 14.99%); D - Acceptable (CV between 15% and 24.99%); E - Use with caution (CV between 25% and 34.99%); F - Too unreliable to publish (CV greater than or equal to 35% or sample size is too small to produce reliable estimates).

Charts

1.	Year-over-year change in average weekly hours and average weekly earnings	8
2.	Year-over-year change in average weekly earnings in the 10 largest sectors, August 2011 to August 2012	9
3.	Year-over-year growth in average weekly earnings by province, August 2011 to August 2012	10

Chart 2
Year-over-year change in average weekly earnings in the 10 largest sectors, August 2011 to August 2012

Weekly earnings in professional, scientific and technical services rose 7.4% to \$1,273.60, with gains in almost all industries within the sector.

Weekly earnings in accommodation and food services increased 5.0% to \$374.54 in the 12 months to August. Growth was most notable in special food services, limited-service eating places and traveller accommodation. Payroll earnings in this sector were the lowest among all sectors, partly because it had the lowest weekly hours.

In construction, weekly earnings rose 4.4% to \$1,144.43, with notable growth in non-residential building construction; highway, street and bridge construction; and building finishing contracting.

Average weekly earnings in administrative and support services declined 3.2% to \$724.03, mostly in employment services.

Average weekly earnings up in every province

Average weekly earnings of non-farm payroll employees increased in every province in the 12 months to August. Growth was notably above the national average in Newfoundland and Labrador and Saskatchewan.

Chart 3
Year-over-year growth in average weekly earnings by province, August 2011 to August 2012

In Newfoundland and Labrador, average weekly earnings were \$942.31 in August, up 8.1% from 12 months earlier. This was the third consecutive year-over-year increase above 6%. Weekly earnings in the province are among the highest in the country.

In Saskatchewan, average weekly earnings increased 6.1% in the 12 months to August, to \$938.57, and were also among the highest in the country. Earnings in the province have been higher than the national average since August 2011.

Average weekly earnings in Prince Edward Island were \$761.13 in August, up 5.0% compared with 12 months earlier. Year-over-year increases in earnings for this province have been at or above the national average since the start of 2012.

In Quebec, average weekly earnings amounted to \$829.55 in August, up 4.5% from 12 months earlier.

Average weekly earnings remained the highest of all provinces in Alberta, at \$1,084.26 in August. On a year-over-year basis, earnings increased 3.2% in the province, just under the national average.

Weekly earnings in Ontario grew 3.0% to \$919.05, the fourth-highest earnings level in Canada. Year-over-year growth in Ontario has been below the national average since October 2010.

Non-farm payroll employment by sector

Total non-farm payroll employment rose by 45,500 between July and August, the sixth consecutive monthly increase.

In August, payroll employment increased in most sectors, including educational services; public administration; manufacturing; health care and social assistance; and mining, quarrying and oil and gas extraction.

On a year-over-year basis, payroll employment rose by 316,000 (+2.1%), with most of these gains occurring since February 2012 (+285,100).

Among all sectors, mining, quarrying, and oil and gas extraction continued to post the highest 12-month growth rate in payroll employment, at 10.7% in August. It was followed by construction (+5.3%); accommodation and food services (+3.2%); professional, scientific and technical services (+2.7%); and transportation and warehousing (+2.7%).

Note to readers

The Survey of Employment, Payrolls and Hours (SEPH) is a business census of non-farm payroll employees. Its key objective is to provide a monthly portrait of the level of earnings, the number of jobs and hours worked by detailed industry at the national, provincial and territorial level.

Statistics Canada also produces employment estimates from its monthly Labour Force Survey (LFS). The LFS is a household survey, the main objective of which is to divide the working-age population into three mutually exclusive groups: the employed (including the self-employed), unemployed and not in the labour force. This survey is the official source for the unemployment rate and collects data on the socio-demographic characteristics of all those in the labour market.

As a result of conceptual and methodological differences, estimates of changes from SEPH and LFS do differ from time to time. However, the trends in the data are quite similar.

Unless otherwise stated, this release presents seasonally adjusted data, which facilitates comparisons by removing the effects of seasonal variations. For more information on seasonal adjustment, see *Seasonal adjustment and identifying economic trends*.

Non-farm payroll employment data are for all hourly and salaried employees, as well as the "other employees" category, which includes piece-rate and commission-only employees.

Average weekly hours data are for hourly and salaried employees only and exclude businesses that could not be classified to a North American Industry Classification System (NAICS) code.

All earnings data include overtime pay and exclude businesses that could not be classified to a NAICS code. Earnings data are based on gross payroll before source deductions.

Average weekly earnings are derived by dividing total weekly earnings by the number of employees.

With each release, data for the current reference month are subject to revision. Data have been revised for the previous month. Users are encouraged to request and use the most up-to-date data for each month.

Data on the education sector

Changes in payroll employment in education during the summer months can be affected by changes in payment schedules and school-year calendars. Month-to-month changes should therefore be interpreted with caution, and more attention given to long-term trends.

Survey overview

The monthly Survey of Employment, Payrolls and Hours (SEPH) is designed to provide monthly estimates to measure levels and month-to-month trends of payroll employment paid hours and earnings. The data are compiled at detailed industrial levels for Canada, provinces and territories.

Methodology

Target population

The target population is composed of all employers in Canada, except those primarily involved in agriculture, fishing and trapping, private household services, religious organisations and the military personnel of the defence services. SEPH draws its samples from the Business Register (BR) maintained by the Business Register Division of Statistics Canada and from a list of all businesses registered in Canada Revenue Agency's (CRA) Business Number program with one or more active payroll deduction accounts.

The Business Register is a list of all businesses in Canada and is updated each month using data from various surveys, business profiling and administrative data. The Business number is a unique identifier assigned by CRA to business participating in one or more of the following programs: Payroll Deduction, Goods and Services Tax, Importer and Exporter Tax and Corporation Tax. The payroll deduction source includes all employers with remittances for employee income taxes, CPP/QPP and Employment Insurance contributions.

The statistics contained in this publication are based on:

- a census of administrative records for all employers' establishments that are in-scope for the survey and are present on the Business Register. The monthly payroll and employment estimates are derived from the administrative source.
- a sample survey "Business Payrolls Survey (BPS)" conducted monthly to collect data required to estimate SEPH variables not available on administrative records. The estimates derived from the administrative source are combined with the results of the BPS to produce estimates for the full range of SEPH variables.

Terms and definitions

Enterprise: An enterprise is any business or institution whether incorporated or not; it comprises sole proprietorships, partnerships, companies and other forms of organizations. An enterprise is considered to be simple if all its establishments operate in the same province/industry classification; otherwise, an enterprise is classified as complex.

Establishment: For statistical purposes it is the smallest entity capable of reporting statistics of economic production, typically a factory, a mine, a store or a similar unit.

Industry classifications: the North American Industry Classification System 2007 (NAICS) is based on the supply side or on production oriented principles. Each establishment is assigned an industry code according to the NAICS. A description of the various industries and groups of industries is contained in the "North American Industrial Classification System" manual, Catalogue no. 12-501-XPE. For analytical purposes, we have created special groupings that are not part of the NAICS classification.

Special industry groupings based on NAICS 2007

Industrial aggregate (00-91N) represents the sum of all the industries included in the survey. Since March 1994, the employment estimates for the industrial aggregate include the unclassified businesses (00).

Unclassified businesses (00) represents the businesses that have not yet been classified to a NAICS, a province or to a territory. The employment estimates for industrial aggregate include the unclassified businesses.

Goods-producing industries (11-33N) comprise forestry (11N), mining (21), utilities (22), construction (23) and manufacturing (31–33).

Service-producing industries (41-91N) consists of trade (41, 48-45), transportation and warehousing (48-49), information and cultural industries (51), finance and insurance, real estate and rental and leasing (53), professional, scientific and technical services (54), management of companies and enterprises (55), administrative and support and waste management and remediation services (56), educational services (61), health care and social assistance (62), arts, entertainment and recreation (71), accommodation and food services (72), other services (81), public administration (except for military personnel and other government services) (91).

Forestry, logging and support (11N) includes forestry and logging (113) and support activities to forestry (1153).

Durable goods manufacturing (321N) includes wood products manufacturing (321), non-metallic mineral products manufacturing (327), primary metal manufacturing (331), fabricated metal products manufacturing (332), machinery manufacturing (333), computer and electronic products manufacturing (334), electrical equipment, appliances and components manufacturing (335), transportation equipment manufacturing (336) and furniture and related products manufacturing (337) and miscellaneous manufacturing (339).

Non-durable goods manufacturing (311N) includes food manufacturing (311), beverage and tobacco products manufacturing (312), textiles mills (313), textile products mills (314), Clothing manufacturing (315), leather and applied products manufacturing (316), paper manufacturing (322), printing and related support activities (323), petroleum and coal products manufacturing (324), chemical manufacturing (325), plastics and rubber products manufacturing (326) and miscellaneous manufacturing (339).

Trade (41-45N) includes wholesale trade (41) and retail trade (44–45).

Education special aggregation (611N) includes elementary and secondary schools (6111), community college and CEGEP(s) (6112), universities (6113), business schools and computer management training (6114) and technical and trade schools (6115).

Public Administration (91) includes only the establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

Geographic classification: Reporting units are assigned to a province or territory.

Paid absence: Paid absence includes, statutory holidays, paid holidays, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

Standard workweek: The hours in the standard workweek constitute the average number of hours of work normally scheduled in a workweek.

Variables

Employee: The employment is derived from administrative records. Since the data for the different employee categories are not reported on the administrative records, the BPS survey is conducted to estimate ratios needed to calculate those variables.

The survey determines an employee as being any person drawing pay for services rendered or for paid absences and for whom the employer must complete a Canada Revenue Agency T-4 form.

The employee concept includes full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses, the self-employed, unpaid family workers, persons working outside Canada, military personnel and casual workers for whom a T-4 is not required. It also excludes those who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmens' compensation or other related fund, etc.). However, employees paid for part of the reference period and unemployed or on strike for the rest of this period are included in the survey.

The employees are classified into the following categories:

Employees paid by the hour: any employee whose basic wage is expressed as an hourly rate.

For Elementary and Secondary schools (6111), Community colleges and CEGEP(s) (6112), Universities (6113), Business schools and Computer management training (6114) and Technical and Trade schools (6115) industries, this category of employment represents Non-teaching Staff: all employees other than teachers and academic staff i.e. president, vice president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (janitor, bus driver etc).

Salaried employees (paid a fixed salary): any employee whose basic remuneration is a fixed amount for at least one week.

For Elementary and Secondary schools (6111), Community colleges and CEGEP(s) (6112), Universities (6113), Business schools and Computer management training (6114) and Technical and Trade schools (6115) industries, this category of employment represents Teaching Staff: those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

Other employees: those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc. Although this variable is not included in this document, the data remains available.

For Elementary and Secondary schools (6111), Community colleges and CEGEP(s) (6112), Universities (6113), Business schools and Computer management training (6114) and Technical and Trade schools (6115) industries, this category of employment represents Supply or Substitute Teachers: teachers who are called in to teach whenever their services are needed either to augment the existing staff or as a short-term replacement for a full-time or part-time teacher.

Weekly Payrolls: Weekly payrolls are defined as the portion of gross monthly payrolls that reflect work performed during the reference week. It represents the gross dollar value before deductions for income taxes, employment insurance contributions etc., including regular pay, overtime and a portion of bonuses, commissions and other type of special payments. The payroll concept excludes dollar amounts that are taxable allowances and benefits, certain types of non-wage compensation as well as employer contributions to employment insurance, Canada/Quebec

pension plans, provincial medical plans, workers compensation and other welfare plans. Some annual special payments are excluded while other lump sum special payments are adjusted to coincide with the reference week period. The gross monthly payrolls are derived from Administrative records.

Average weekly earnings (including or excluding overtime) for all employees: Average weekly earnings are derived by dividing total weekly payrolls (including or excluding overtime) by the payroll employment.

Average hourly earnings (including or excluding overtime) for hourly paid employees: Average hourly earnings for hourly paid employees is obtained by dividing the total weekly payrolls (including or excluding overtime) by the total number of weekly hours (including or excluding overtime).

Average hourly earnings (including or excluding overtime) for salaried employee: Average hourly earnings is derived by dividing the total weekly payrolls (including or excluding overtime) by the number of paid hours.

Average weekly hours (including or excluding overtime) for hourly paid employees: Average weekly hours are obtained by dividing the total paid weekly hours (including or excluding overtime) by the number of hourly paid employees.

Average weekly hours for salaried employees: Average weekly hours are obtained by dividing the total paid weekly hours by the number of salaried employees.

Total hours paid for hourly paid employees (including or excluding overtime): Total paid hours are defined as all hours paid (including or excluding overtime hours) including hours of paid absence.

Total hours paid for salaried employees: Total hours paid are obtained by multiplying the average Standard work week hours (note that this variable does not include overtime) by the number of salaried employees.

SEPH Data by size of enterprises

On a quarterly and annual basis, SEPH produces Employment, Average Weekly Earnings and Hours data by employment size of enterprises for Canada, the provinces and territories. Provincial and territorial employment is thus allocated to the size of employment of the enterprise in Canada. The employment size of an enterprise is calculated as an average of the monthly employment levels reported for the period. The data is produced at the sector level of the North American Industrial classification and for the Industrial aggregate level.

The employment sizes are:

- 0 to 4 employees
- 5 to 19
- 20 to 49
- 50 to 99
- 100 to 299
- 300 to 499
- 500 and plus
- All sizes

SEPH also produces data for the following sizes:

- 0 to 49 employees
- 50 to 299
- 300 and plus

The data produced by size of enterprises will generally be more volatile than the estimates produced for the SEPH monthly production. For example, the levels published for smaller size of employment cells may be affected by the movements of enterprises from one size to another from quarter to quarter. Other events such as strike, temporary closures, changes in the enterprise structures on the Business Register will also cause volatility to the more detailed sizes series. It should be noted that while the data by employment can be a useful research tool, it should not be used in contract escalation because of the potential for higher level volatility associated with this product.
