

Prairies

Percentage change in number of people receiving Employment Insurance regular benefits, September 2008 to September 2009, by Census Metropolitan Areas (CMAs) and Census Agglomerations (CAs)

Note: The CMAs and CAs in Canada (2001 Census geography) were divided into five groups or quintiles, ranked from the smallest to the largest percentage change in the number of regular beneficiaries. Data for the most recent month are preliminary.
