1. Data source: Statistics Canada, National Population Health Survey, 1996/97, cross sectional sample, health file
2. Population aged 65 and over who reported when they had their last influenza immunization (flu shot).
3. Bootstrapping techniques were used to produce the coefficient of variation (CV) and 95% confidence intervals (CIs).
4. Data with a coefficient of variation (CV) from 16.6% to 33.3% are identified by an (E) and should be interpreted with caution.
5. Data with a coefficient of variation (CV) greater than 33.3% were suppressed (F) due to extreme sampling variability.
6. Comparable data are not available for 1994/95 and 1998/99.
7. CANSIM table number 01040045.
