Thessalon	1,346	1	0	1	74	0	74	42.0	39.2

1. Populations are based on July 1st preliminary postcensal populations for 2009 (based on the 2006 Census), Demography Division, Statistics Canada.

Populations are adjusted to follow policing boundaries. Populations for 2010 are not yet available.

2. The police-reported Crime Severity Index measures changes in the severity of crime from year to year. Each type of offence is assigned a weight derived from actual sentences handed down by courts.

3. The weighted clearance rate is based on the same principle used to create the Crime Index, whereby more serious offences are assigned a higher weight than less serious offences. Applying this concept to clearance rates means that, for example, the clearance of a homicide, robbery or break and enter receives a higher weight than the clearance of less serious offences such as minor theft, mischief and disturbing the peace.

Note(s): Use caution in comparing forces: The number of officers may not reflect the number available for general community policing because some officers in certain communities are restricted to specific locations (e.g. ports, airports).
