Published by authority of the Minister responsible for Statistics Canada

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Cette publication est disponible en français sur demande (n° 91F0015M au catalogue).

Acknowledgments

The author wishes to thank André Cyr (Chief, Development and Demographic Methods Section, Demography Division, Statistics Canada) for his invaluable help in structuring and editing this report. Ravi Verma also provided useful comments.

The provincial and territorial statistical focal points and the different provincial/territorial health departments supplied data on health care registrations as well as updated a 1996 questionnaire on the provincial/territorial health care registration system.

Ian Kisbee compiled the provincial/territorial health care registration data and Hélène Landry provided the Canada Child Tax Benefit data.

Finally, a deep appreciation goes out to Julie Dussault who (with the help of Minh Ngô and Nicole Montsion) who used her technical expertise to produce the final version of this document.

1. Introduction

For several years, we have investigated the idea of using provincial/territorial Medicare records of new residents to estimate the size of inter-provincial migration. We have undertaken several studies since the early 1990s as to the feasibility of using this data source.

Independent research is concurrently being undertaken by Ravi Verma on an analysis of our annual estimates comparing them with the provincial/territorial health registrations and census information and investigating how health care records could be used to update preliminary estimates. Our annual estimates are done using tax information from the Canadian Revenue Agency (CRA) as of the end of April. Final quarterly figures are pro-rated to the tax information.[1]

We should clarify that Demography Division does not have access to the provincial or territorial health care records but instead base our analysis on monthly reports or tables provided on new registrants. The present study wishes to re-examine these provincial/territorial health registration reports for new residents to determine the viability of using these data as a substitute for our current data source of the Canada Child Tax Benefit (CCTB) for estimating preliminary quarterly inter-provincial/territorial[2] migration. To do this, the study will also evaluate the data quality of these Medicare records and report on the issues, both qualitative and operational, surrounding the use of these files.

Clearly the current arrangement is insufficient to meet the needs of the demographic estimation program as we would require statistics on infra-provincial migration not currently provided by the health care tables. This criterion would have to be assessed independently from the total raw files and is not addressed in this report.

The purpose of this report is to present our findings on a comparative analysis of using health care records and using CCTB data for estimating preliminary migration estimates. While some of our analysis will focus on the complete sources of data, the direct comparative analysis will target the 0 to 17 year olds.

We will explore a number of qualitative dimensions for assessing the data all described in the next section. While some relate to the entirety of the health care records, this information is not readily available for our analysis. Demography Division receives monthly information on new provincial/ territorial registrants and this is the basis for our comparative analysis. By limiting our analysis to the population 0 to 17[3], we have determined that the CCTB data offer the best comparative base for quality evaluation and have the fewest data adjustments compared with other data sources. Its structure and time-frame (i.e. monthly) is closest to what we get from the provincial and territorial new resident health records.

1. The tax data are based on the end of April value which is then applied as a proxy, without adjustment for the July 1 population estimates, the reference date for our annual numbers.
2. In this paper, the term inter-provincial migration also includes the idea of inter-territorial migration.
3. Annual estimates of the 0 to 17 age cohort are based on CRA Tax Filer information and result in lower figures than if one were to roll up the monthly CCTB figures. As well, final quarterly estimates are also based on the CRA Tax filer information. There is no relation with the final inter-provincial migration data between the adults and children as the tax files are used for final totals and not the CCTB for children.

The present report will examine these same two data sources both for monthly and quarterly estimates. You will notice that Quebec and Alberta are often missing from our analysis as they do not provide information on new registrants.[4]

4. Alberta started providing monthly data after this analysis was done. Please refer to Annex I for a discussion of this new data source.

2. Methodology of the analysis

For our comparative analysis, we will focus specifically on the 0 to 17 age group since Demography Division uses the CCTB's eligible children population, aged 0 to 17 inclusively, on which to base its preliminary quarterly population estimates of the inter-provincial migration component. Prior to 1993, the Family Allowance Benefits (FAB) file was utilized, but due to legislative changes, this universal child benefit was replaced with the income-based CCTB. The analysis will cover the period 2001/2002 to 2005/2006 since preliminary estimates of children from the CCTB are still readily available. Previous data were revised and adjusted for the inter-censal error following the 2001 Census.[5]

A 2007 update of the results of part of a questionnaire given to the provinces and territories in February 1996 is included. Tables 2 and 3 in section 3.2 outline each province and territory's medical coverage based on the inclusion criteria. To assess the feasibility of Medicare records as a source for estimating migration, we have provided the following criteria:

Text table 1
Criteria to assess the feasibility of using Medicare records for estimating migration

Criterion	Description	
Coverage	In that it measures all of the population of interest. This is measured in two parts: coverage issues related to the eligibility of the administrative program and the completeness of their deemed population.	
	Eligibility	Of the province's total resident population who is covered by the administered program.
	Completeness	Between the mandated program and its "client" base, how many are covered.
Consistency	That the various criteria mentioned or collected are stable over time.	
Timeliness	That the data are available in time for the released information to be current and reflect the phenomenon that we are trying to study over time (e.g. there is no lag effect or that the lag is correctable).	
Reliability	That the data be made available and in a useable form consistently so that provincial changes do not affect its reliability, timeliness and quality	
Level of detail	That the level of detailed breakdown (e.g. age, sex, origin of in-migrants, both in-migrants and out-migrants) is available and accurate.	

As a point of reference, we will introduce a coverage table comparing all of the provincial health care registrations to our estimates of the total population. **Coverage** implies two dimensions of measurement: how well the file represents the entire population of the province or territory by its inclusion criterion (**Eligibility**) and secondly the adherence to the program from its citizens (**Completeness**), especially, new citizens moving into a province or territory. The concept of eligibility is more entrenched in each province's administrative and legislative rules about who is on their administrative file, but issues like type of medical coverage, opting out provisions and user fees are

5. Final quarterly estimates are based on the CRA Tax filer information and adjusted for the error of closure measured from the census and interpolated to the previous census for this component.

likely to have an impact on the adherence of its citizens to the program. All other criteria are less rigid and are reflections of the administrative burden of preparing and reporting the information to Statistics Canada.

Table 1 below is a summary of our assessment for each province and territory on how it meets these quality measures. The top portion of the table is a result of the **coverage** measurement of the entire health care files, while the lower portion summarizes the information from the health care registrations of new residents. These findings are discussed in the paper.

Table 1
Quality measure comparison between provincial/territorial health care registrations of total residents, new residents and the CCTB files

	Province / territory													CRA
Criterion	N.L.	P.E.I	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.	Y.T.	N.W.T.	Nvt.	CCTB
Total health care registrations														
Coverage														
Completeness	No[1]	No	No	Yes	Yes	Yes	Yes	No	Yes	No	No	No	No	Yes
Eligibility[2]	Partial	Partial	Partial	Yes	Partial	Partial	Partial	Partial	Yes	Partial	Partial	Partial	Partial	Yes
New resident health care registrations														
Consistency	No	No	No	No	.	No	No	No	.	No	No	No	No	Yes
Timeliness														
3-month lag[3]	B	C	C	A	.	B	B	B	.	C	B	B	A	…
Punctuality	Yes	Yes	Yes	Yes	.	Yes	Yes	Yes	.	Yes	Yes	Yes	No	Yes
Reliability[4]	0	0	0	5	.	1	0	2	.	0	7	2	0	Yes
Details														
Age: individual year	..	Yes[5]	..	..	.	..	..	..	.	..	Yes[5]	..	..	Yes
Age: ≤ 17	..	..	..	Yes	.	..	..	..	.	..	..	..	..	..
Age: 5-year group	Yes	..	Yes	Yes	.	Yes	Yes	Yes	.	Yes	..	Yes	Yes	Yes
Sex	No	Yes[5]	No	No	.	Yes	No	No	.	No	Yes[5]	No	No	Yes
In-migrants	Yes	Yes	Yes	Yes	.	Yes	Yes	Yes	.	Yes	Yes	Yes	Yes	Yes
Out-migrants	No	No	No	No	.	No	Yes	No	.	No	No	No	No	Yes
Unknown origin of in-migrant	No	No	No	No	.	No	No	Yes	.	Yes	No	No	No	No

Notes:
1. 2005/2006: too many people registered.
2. No, yes or partial under eligibility refers to whether the province/territory covers all or part of the Non-Permanent Residents (NPRs) and others.
3. Results based on Table 6 where A = No effect, B = Improved fit and C = Consistently improved fit.
4. Numbers refer to number of missing months over a 72-month period.
5. Microdata supplied for Prince Edward Island and Yukon.

CRA: Canada Revenue Agency
CCTB: Canada Child Tax Benefit

Two other criteria applicable across provinces and territories are also essential:

Text table 2
Further criteria to assess the feasibility of using Medicare records for estimating migration

Criterion	Description
Uniformity	Similar kind of data across jurisdictions.
Accuracy	That the administration of the data source does not perturb or bias the desired measurement (that of inter-provincial migration).

These latter criteria are assessed more from their administrative rules and how they differ from one jurisdiction to another than from the data itself. In **Annex H**, you will find a copy of the provincial registration forms (where available) and their rules for program administration.

Below is a table summarizing how the provincial/territorial health records meet the **uniformity** and **accuracy** criteria.

Text table 3
Application of uniformity and accuracy criteria to provincial/territorial Medicare records

Criterion	Over all provinces and territories

Uniformity	• Extensive (completeness) of the total population.
	  o Some with undercoverage; some with overcoverage.
	• The uneven lag between the actual move and the registration of a move is a serious impediment to measuring interprovincial migration as it is not systematically correctable.
	• Uneven eligibility (**coverage**) as certain provinces do not cover all non-permanent residents or military etc.
	• Uneven content (see previous table).
	• Uneven administration (processing).
	  o Clumping of cases seems to occur over the summer months as a backlog of unprocessed requisitions only get processed in the fall (this phenomenon is unpredictable and may be subject to other provincial effects like labour disputes).

Accuracy	• Special rules may affect the measurement of migration.
	  o Certain groups are excluded (see **coverage**) so their migration is not measured.
	  o One of Alberta's administrative rules prevents certain migrations from being measured as they will defer registration up to 12 months for married persons until both spouses have relocated.
	• Opting out of medical coverage may impact on who registers.
	• Short-term migration is likely missed by the health care files because of the complexity of eligibility rules versus the risk of not having health coverage for the short period. People with temporary employment may not register.
	• Incomplete administrative records (See missing data points in **Annex G** and see unknown origin category in Saskatchewan in **Annex D**).

3. Assessment of Medicare records and the CCTB

Of all the criteria used in assessing quality, **coverage** is one of the most important as it impacts all other measurements. All administrative records are subject to coverage problems when they are used for estimation purposes. In fact, overall coverage is one of the greatest strengths of the health care files while it is one of the greatest weaknesses of the CCTB data in that it only covers a portion of intended population, namely children. However, by limiting the study to the coverage of children, both files are more comparable. The main issue with coverage error is whether the problems can be measured and corrected. Coverage errors are correctable if the proper steps are taken to identify the size of the coverage error and the potential biases that may be introduced in the estimation process. Not having access to all the health care records seriously impedes any chance of bias correction due to coverage error.

Coverage problems can lead to estimates that do not reflect reality or biased estimates; where the error is not evenly distributed among important sub-populations, and more importantly, populations who are more likely to migrate. Given the high stakes involved in producing unbiased results when comparing provincial estimates of migration, other elements of our assessment take on an important role.

In this section, we will also discuss aspects of **completeness** of the health care records by emphasizing the various populations covered by each province and how they may differ from one another. Special attention will be placed on identifying problems that may lead to uneven estimation error across jurisdictions. Issues of **uniformity, consistency, timeliness, reliability, the level of details** and the **accuracy** of these files will be discussed throughout the paper.

3.1 Total health registration coverage comparison

In discussing "**coverage**" we wish to make a distinction in definition as we are using the term in two different senses:

- **Completeness** of the Medicare file (an administrative or quality assurance concept)
    - e.g. people who do not have a health card as they have opted out or never applied for one even though they were entitled to be covered (this creates undercoverage);
    - e.g. there may be duplicate records for the same person; or duplicate records of people who have left the province but did not notify the province that they had left and still have a card or they have died but still have an active record on file (this creates overcoverage).
- **Eligibility** categories for receiving provincial health coverage (a legal or governmental definition)
    - Provincial or territorial eligibility is uneven (e.g., in some cases, refugee status claimants are not covered by provincial health care but are included in Demography Division's population estimates);
    - Demography Division's estimate of inter-provincial migration, includes in its population estimates, NPRs, the armed forces, Royal Canadian Mounted Police (RCMP), Canadian Security Intelligence Service (CSIS) and inmates of federal

penitentiaries and their dependents that are covered by Federal health care programs and not the provinces or territories;

- Other administrative rules of certain provinces may impede the accurate measurement of the migration event (e.g., in Alberta, a person moving to Alberta and residing more than 183 days - which meets one of the permanent residency requirements – may not get covered until their spouse moves to Alberta or in the 13th month of residency in Alberta should the spouse not move.[6] In other words, if the spouse has no intention of moving to Alberta, there is a waiting period of 12 months before the new resident can get medical coverage in Alberta).

Currently the provinces do not send us a running tally of their health care registrants on a regular basis. However, most of them do release this information to Health Canada for their annual report.

Table 2 compares the coverage rates of health care registration files to the population estimates from Demography Division. It is assumed that, barring the exclusions noted above, the total number of those with health coverage would be equivalent to the population estimates as Canada provides universal health care. If the ratio of the provincial/territorial registrations to our population estimates is close to one then at least the population bases are comparable. We expect because of the previously noted exclusions in coverage of the health care programs a slight underestimation from the population estimates produced by Demography Division.

[Note: We do not have age/gender or regional breakdowns and have requested these from the statistical focal points for a forthcoming analysis. These are total tallies of registrants and certain undercovered populations may be off-set by overcovered populations. Discussions on these phenomena are featured later on.]

6. As per information from Client Services Branch, Alberta Health and Wellness. See *Annex H* and the Alberta Application for Health Care Insurance Plan Coverage, Section B, and Question 2 for the question on residency of spouse.

Table 2
Coverage ratios of total provincial health care registrant population to the Demography Division estimated population, for selected years, 2000 to 2006

Province/territory	2000	2001	2002	2003	2004	2005	2006	Average 2000 to 2006
					ratio			
Newfoundland and Labrador[1]	1.16	1.18	1.08	1.08	1.16	1.10	1.07	1.12
Prince Edward Island	0.98	1.01	1.02	1.03	1.03	1.04	1.04	1.02
Nova Scotia	1.01	1.02	1.02	1.02	1.02	1.02	1.00	1.02
New Brunswick	0.98	0.99	0.98	0.98	0.98	0.98	0.98	0.98
Quebec[2]	0.99	0.99	0.98	0.98	0.98	0.98	0.99	0.99
Ontario	0.98	0.99	0.98	0.99	0.99	0.99	0.99	0.99
Manitoba	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00
Saskatchewan	1.03	1.02	1.03	1.03	1.01	1.02	1.14	1.04
Alberta	0.99	0.99	1.00	1.00	1.00	0.99	0.98	0.99
British Columbia	0.94	0.94	0.97	0.97	0.98	0.99	0.98	0.97
Yukon	1.03	1.03	1.03	1.01	1.00	1.02	1.03	1.02
Northwest Territories	1.01	1.03	1.03	0.96	1.01	1.03	1.05	1.01
Nunavut	..	0.97	1.01	1.02	1.08	1.06	1.02	1.03
Total	0.98	0.99	0.99	0.99	0.99	0.99	0.99	0.99

Notes:
Data are as of March 31.
1. For 2006, number of registered persons exceeds the number of residents. Re-registration of residents commencing in [April 1] 2006.
2. As of July 1.

Sources:
Demography Division, Statistics Canada, Quarterly Demographic Estimates, 91-002-XWE (1st quarter)
Health Canada, Canada Health Act - Annual Reports.
For New Brunswick data for 2005 and 2006: Department of Health. Government of New Brunswick, 2005/2006 Annual Report - Health, p. 64.
Quebec Health care registrations - 2000 to 2005 from www.prod.ramq.gouv.qc.ca.
Quebec Health care registrations - 2006 - e-mail from L'Institut de la statistique du Québec.

These coverage ratios are presented here from published information and cannot be further analyzed by age, gender or sub-provincial / territorial representation. For example, one may want to see if problems of overcoverage are linked to the elderly or some other group in the population. A recommendation would be to get detailed breakdowns of population counts from all provincial/territorial health care registrations to compare to the census information.

Also, the coverage number by province may not accurately reflect the provincial /territorial records in duplication between jurisdictions. Provinces that are not being notified when a resident has left the province (so he/she still has an active health card) could explain in part ratios over one in certain areas where out-migration is higher than in-migration. Deceased individuals with a still-active health care account may also cause a ratio greater than 1.0. Not registering for a health card or just opting out could result in a ratio of less than 1.0. Differences in our estimates could also be the result of the timing as there maybe different reference periods even after adjustments are made. As you will see in the next table the population included on the health care files is actually expected to be lower than their actual resident population because of exclusionary rules. It is difficult to ascertain the size of the excluded population as they often overlap with other inclusionary rules (e.g., refugees may be excluded from certain provincial health care programs, unless they hold a work permit, then they are included).

In most cases the coverage ratio is close to one for the total population estimate. This may be an artefact of errors that cancel each other out, and does not reflect the data's accuracy. The coverage rate is the most consistent in Manitoba. This ratio indicates that, overall, the registered population as measured against the provincial/territorial total health care registration database are close to Demography Division's component method of population estimation.

Newfoundland and Labrador has the most divergent ratio averaging 1.12 between 2000 and 2006 with a ratio of 1.07 in 2006. This means that Newfoundland and Labrador has more people under their health care system than what is estimated. This discrepancy probably lies with the Newfoundland and Labrador health care registration system as in the Canada Health Act Annual Report for 2006, a footnote states that the *number of registered persons in Newfoundland exceeds the number of residents. Re-registration of residents to commence in [April 1] 2006*.

3.2 Consistency and completeness of health care data

Tables 3 and 4 present data on the **consistency** and **completeness** of data relative to what is covered by registrants to the provincial / territorial health care systems. These tables show the results of a 2007 questionnaire sent to the provinces and territories in order to update a similar questionnaire back in 1996.

While the data are summarized, they do point to the even application of the health care services from one province and territory to another. Moreover, they also point out the various impediments one might have to circumvent in order to get full measurement of the population's migration.

Table 3
Opting out, premiums and coverage of dependents of specialized groups, 2007

Province/Territory	Opting out	Premiums paid by beneficiaries	Amount of premium	Are dependents of the following groups covered by your plan?				
				Members of Armed Forces	Members of RCMP[11]	Members of CSIS[12]	Inmates of federal penitentiaries	Canadian diplomat
Newfoundland and Labrador	Yes[1]	No	…	Yes	Yes	Yes	Yes	Yes
Prince Edward Island	.	No	…	Yes	Yes	Yes	Yes	Yes
Nova Scotia	Yes	No	…	No	No	Yes	No	See note[2]
New Brunswick	Yes	No	…	Yes	Yes	Yes	Yes	Yes
Quebec	No	No	…	Yes	Yes	Yes	Yes	Yes
Ontario	Yes	No[3]	…	Yes[4]	Yes[4]	Yes[4]	Yes[4]	Yes[4]
Manitoba	Yes/no[5]	No	…	Yes	Yes	Yes	Yes	Yes
Saskatchewan	No	No	…	Yes	Yes	Yes	See note[6]	See note[7]
Alberta	Yes	Yes[8]	Single: $44 Family: $88	Yes	Yes	Yes	Yes	…
British Columbia	Yes	Yes	1 person: $54 2 persons: $96 3 persons: $108	Yes	Yes	Yes	Yes	Yes[9]
Yukon	Yes[10]	No	…	Yes	Yes	Yes	Yes	Never had any
Northwest Territories	Yes	No	…	No	No	No	No	No
Nunavut	Yes	No	…	No	No	No	No	No

Notes:

1. Very rare since there are no premiums.
2. They would have to adhere to the residency requirements/temporary absence guidelines as other residents of Nova Scotia.
3. The Ontario Health Premium is collected through the income tax system and it is not connected to OHIP registration and/or eligibility.
4. Ontario health insurance will be provided if the dependant meets all residency and citizenship/immigration qualifications as defined in Regulation 552 of the Health Insurance Act (HIA).
5. Manitoba does not encourage opting out but cannot force residents to apply. In cases of large medical bills, Manitoba would/could be responsible to apply. There is nothing in the Manitoba Act or Regulations that allows this.
6. Concerning dependents of inmates of federal penitentiaries: if permanent resident in Saskatchewan (with healing lodge located in south-western part of province). There is a plan to accommodate children of federal prisoners, but there has been no dialogue on provision of benefits to children as yet. (Taken from 1996 survey).
7. Saskatchewan's temporary absence provisions are a maximum of 2 years. If a Canadian diplomat and family are returning to Saskatchewan within that time frame, they would retain Saskatchewan Health Coverage. Otherwise, they would be required to obtain other health insurance.
8. The federal government pays for Treaty Indians. Some groups, such as social service recipients, are exempt from paying premiums. In addition, some low-income Albertans qualify for premium assistance. (Taken from 1996 survey).
9. Yes to accompanying dependents of foreign diplomats. Canadians serving as diplomats in foreign countries may be eligible for up to 24 months of coverage (depends on individual circumstances such as any previous absences).
10. Yes but only if individual absolutely refuses to be registered.
11. RCMP: Royal Canadian Mounted Police
12. CSIS: Canadian Security Intelligence Service

Table 4
Coverage of non-permanent residents, 2007

	Are the following persons and their dependants covered by your plan?				
Province/territory	**Persons claiming refugee status**	**Persons with a student visa**	**Persons with a work permit**	**Persons with a temporary residence permit**	**If at least one of these groups is covered, what is the waiting period for eligibility?**
Newfoundland and Labrador	No	No	Yes [1]	No	3 months
Prince Edward Island	No	No	Yes [2]	No [3]	See notes 2, 3
Nova Scotia	No	Yes [5]	Yes [6]	No	See notes 4, 5, 6
New Brunswick	Yes	Yes	Yes	Yes	3 months
Quebec	No	No [7]	Yes [8]	Yes [9]	If requirements met, waiting period of 90 days
Ontario	No [10]	No [10]	Yes [11]	Yes [12]	Typically 3 months except for newborns born in Ontario who are eligible from birth
Manitoba	No	No	Yes [13]	Yes [14]	If outside Canada: 1st day Other provinces: 3 months
Saskatchewan	No	Yes	Yes	Yes	See note 15
Alberta	Yes [16]	Yes [17]	Yes [17]	Yes [17]	Approximately 3 months (Permits must be valid for a minimum period of 12 months)
British Columbia	No	Yes	Yes	No	3 months
Yukon	No	No	Yes	Yes (Minister's discretion)	Immediately
Northwest Territories	No	Yes	Yes	No	3 months
Nunavut	No	No	Yes [18]	Yes [18]	Same day coverage

Notes:

1. If permit is valid for 12 months or more, a person gets immediate coverage.
2. Working visa – No waiting period. Eligibility commences on the date appearing on the visa or date of arrival, whichever is the later date.
3. Temporary Resident Permit - Only eligible in conjunction with a working visa or if Landed Immigrant status is likely.
4. They would be covered if they have applied for permanent resident status or are the holder of a work permit.
5. Foreign students have a 13-month waiting period.
6. They have first day coverage as long as their work visa is valid for a year.
7. Except if Quebec has entered into a social security agreement with the student's country of origin (i.e. with Denmark, Finland, France, Greece, Luxembourg, Norway, Portugal or Sweden) or if the student has a study or training scholarship. See www.ramq.gouv.qc.ca/en/citoyens/assurancemaladie/arriver
8. Under certain conditions such as a specific permit. Employment has to be for more than 6 months.
9. If permits are coded from 86 to 95.
10. Not for persons themselves, but for their Ontario-born dependents. (Taken from 1996 survey).
11. Yes if employer-specific (situated in Ontario) and valid for a period of at least 6 months. Yes for dependants, only if employer hires worker for at least 3 years.
12. Yes if temporary resident permit is of a type and class listed in the regulation.
13. Yes if permit is valid for 12 months or more.
14. Certain categories, but these were not specified. (Taken from 1996 survey).
15. First day of arrival in Saskatchewan, provided that arrival in Saskatchewan was prior to the first day of the third month since arriving in Canada (in other words, if person arrives to live in Saskatchewan before he or she has been in Canada for 3 months). (Taken from 1996 survey).
16. Only persons who claimed refugee status before January 1989 are covered. (Taken from 1996 survey).
17. They may be eligible for coverage on the date of arrival in Alberta as long as they register within three months of arrival and the Canada entry documents are in order. If they apply after three months, Alberta Health determines the effective date of coverage. (Taken from 1996 survey).
18. If permit over 1 year.

Tables 3 and 4 above indicate those areas where the provinces do not cover certain groups while the CCTB does – namely NPRs, the dependents of those in the categories of prisons, the diplomatic corps and the Armed Forces. This "**coverage**" difference would result in a **coverage** ratio of less than one. In some cases, there is also an opting out provision as in Alberta, but the number opting out is low; however, we are unable to estimate this number from the information we have.

As stated earlier, in the case of Alberta, medical coverage for new residents is only provided when both the applicant and spouse are permanently residing in Alberta or after a stay of 12 months if the spouse is not intending to move to Alberta. In the latter case, there is also a timeliness problem due to the lag-effect. This could be significant in times of economic boom as was observed in the booming economy in Alberta of recent months. This has resulted in workers moving to Alberta from other parts of Canada, leaving their spouse behind because of the increased cost and low availability of housing and not being part of the Alberta health care. To further complicate this matter is the inability to accurately measure the number of persons in this situation or the lag that may be anticipated if the spouse does plan to migrate to Alberta later within the year.

3.3 In-migrant comparisons

Although Demography Division publishes data for both in and out inter-provincial/territorial migrants, this kind of **detail** is not available to do a comparison using the health care files as we are presently only receiving in-migrant[7] information through the new-registrants reports. It is uncertain if all the provinces could report the destination of the people who are removed from their health care programs and is it also unclear how accurate such information would be. As well, we lack **detail** as to a single year breakdown from the health care records for most provinces, although conceivably this information could be made available. So in comparing the CCTB data which cover those 17 and under, we have had to make adjustments to the 5-year age grouping data from the health care files.

To adjust for the under 17 age grouping, we estimated 3/5 of the 15 to 19 age group as a proxy to the 15 to 17 age group. Where the data were available by single year of age we were able to get the correct population counts for the 0 to 17 year-old population.

Therefore Table 5 presents the ratio of Medicare new resident data to preliminary CCTB for **in-migrant data only** (for the 0 to 17 age group).

7. Manitoba provides us with monthly, what they call, cancellations. These are similar or equivalent to out-migrants. It is the only province to do so. But there are issues of timing these cancellations with the timing for in-migrants to get net migration. As well, there is no doubt, under-estimation of these out-migrants. E-mail from Manitoba Health Information Management Branch.

Note:

1. The ratio is calculated by dividing the Medicare number over the estimate number.

As Rémillard had previously found in his evaluation of the 1986 to 1995 period, there was a wide range of differences in the in-migration ratio values among the provinces and territories and from quarter to quarter within the same province or territory as was found for this 2001/2002 to 2005/2006 period.

The highest ratios for the 2001 to 2006 period were found in Manitoba, British Columbia and the Northwest Territories (over 1.0 in some cases), while the lowest were in New Brunswick (consistently below 1.0, ranging from 0.1 to 0.8) and Saskatchewan (from 0.4 to 1.7). Overall we note that the CCTB reports more migration than does the health care files.

The province with the worst ratios is New Brunswick. Overall, the new resident data from their health insurance registration files were consistently very low compared to the estimates from the CCTB files for the same cohort. Historically, this pattern was also true for the earlier period, 1986 to 1995. In fact, ratios between the two datasets for the quarters ranged from a high of 0.8 for the October to December 2004 period to 0.1 from October to December 2001, July to September 2003, July to September 2004 and July to September 2005. Annually, the ratio for New Brunswick is between 0.2 and 0.3. We have been in discussions with the province of New Brunswick to resolve the issue surrounding its abnormally low in-migration counts and have summarized our efforts in **Annex C** at the end of this document.

Saskatchewan comes in second for the worse ratios. These ratios also fluctuate widely from 0.4 to 1.7 as stated above. One important factor for Saskatchewan as to why their figures seem to be so much lower than ours has to do with their category of "unknown" – Saskatchewan does not know whether a new resident is from another province/territory or comes from outside Canada. **Annex D** presents these data on a quarterly basis from 2001/2002 to 2005/2006. In some cases, this unknown category represents a significant number of total in-migrants to Saskatchewan: 30% of the total in-migrants or 248 were of unknown origin for the July to September 2003 period; 18% or 333 were unknown for the July to September 2005 period.

We should point out that British Columbia had an annual ratio of 3.4 for October to December 2005 for the 0 to 17 age group – 5,899 in-migrants from British Colombia's new health card registrations from outside the province versus 1,722 in-migrants from the Demography Division estimates (the equivalent estimates for all ages were respectively, 31,444 and 9,378). The British Columbia health care registration figures are more than twice what they have been for the equivalent quarters in earlier years. More specifically, the October and November 2005 figures were higher than normal – for all ages, the average for October 2000 to 2004 was 5,102 while for October 2005 the figure was 10,736. In November, the 2000 to 2004 average was 5,466 but November 2005 had 16,435. Contact with the British Columbia Ministry of Health revealed that the large numbers in October and November 2005 were "an accumulated backlog which was processed in October and November 2005"[8].

As stated previously, the ratio tends to be less than one since many of the provincial/territorial health care systems do not provide coverage to NPRs[9] while Statistics Canada includes them in their inter-provincial migration and population estimates. As well, in compiling data from the

8. E-mail from Health Insurance B.C.
9. According to our 2007 survey, only New Brunswick and Alberta cover all types of NPRs and most jurisdictions did not cover those claiming refugee status except for 2 provinces (Nova Scotia and Ontario) but only under certain circumstances (i.e. they have to have applied for Permanent Residence Status or have a work permit).

provincial/territorial new health card registrations, some provinces did not provide the data for some months (e.g. Saskatchewan was missing November and December 2002; the Northwest Territories did not send us January and February 2005) leading to **completeness** problems.

Nation-wide, when one adds up the quarters for all provinces and territories, 75% of the quarters have a ratio of less than one indicating that the health care registration for in-migrants ages 0 to 17 as reported by the province/territory is less than the Demography Division CCTB-based in-migrant estimates. This is in contrast to the 98% to 99% coverage ratio of all health care registrations reported by the province/territory compared to the total population estimates by Demography Division.[10] On the other hand, over the observed time period, the ratios have gotten closer for both quarterly and annual levels for the 0 to 17 age group with an annual national ratio of about 0.9 in 2004/2005. This may suggest that the nature of the migration captured by the CCTB may be different. The CCTB file may include temporary migration, persons planning to migrate soon after or to migrate back to their original province and so did not change their health coverage because of the long wait period.

On a quarterly basis, almost all provinces and territories for both sets of data showed the highest level of in-migrants in the July to September period; a typical higher migration period. Though there is a difference in the absolute numbers (see Table 6) between the CCTB-based estimates and the provincial/territorial health care information, both of these sources show an overall but different seasonal trend in inter-provincial flows peaking in the June to September period and generally lowest in the January to March period – those with children would tend to move when the children were not in school; thus, the period April to September tend to have more in-migration movement than the October to March period. People also are more inclined to move when the weather is warmer.

For some quarters in certain provinces such as British Columbia (July to September and October to December 2002) and New Brunswick (July to September and October to December 2004), the highest absolute numbers are sometimes reached in the October to December period, based on the Medicare records while the equivalent CCTB-based numbers are highest for the June to September period. This phenomenon could be a lag effect where most provinces and territories have a 3-month waiting period for health-care coverage and new residents may delay in notifying the health care authorities that they are now living in the province/territory.

A month by month comparison of in-migrants is presented in **Annex A**. In looking at the monthly graphs in **Annex A**, it definitely looks like there is a lag effect in many provinces. However, this is not uniformly the case throughout the year or even for some provinces. This level of information shows more volatile findings when the data are compared and it was concluded that the data were best analyzed at the quarterly level to eliminate some of the fluctuations. However, from the monthly flows it is interesting to note that some provinces report no migration at all and this was stated in our conclusion as a qualitative factor about the **reliability** of the source information.

As we had observed an apparent lag in the data, we forced a 3 month lag (similar to most provincial and territorial waiting periods) on the health care data to assess the impact on the differential rates. **Annex B** presents the same two tables only with the Medicare data being lagged by three months (e.g. figures referring to the July to September period were placed in the April to June period) to see whether there was a better fit between the two sources. The Annex also includes a count of whether

10. As we did not have data for Quebec and Alberta for our evaluation, these two provinces are excluded from our analysis and our national figures.

there had been an improvement in the relative differential value; in other words, are more ratios closer to one. Similarly, since the health care files report fewer migrations, we noted the number of times that the differential was greater than 1. Ultimately the net absolute percent difference was compared before and after the lag.

Table 6 shows the absolute percent differences between the CCTB and health care estimates with and without the lagged data. For ease of analysis we have included the average quarterly absolute percent difference.

Table 6
Absolute percent difference of quarterly in-migration based on provincial and territorial health insurance data original and lagged 3 months as compared to preliminary Demography Division estimates (CCTB-based) with annual figures (as of July 1) – 0 to 17 age group

There were consistent improvements after lagging the data in the concordance of the migration figures for the provinces of Prince Edward Island, Nova Scotia and British Columbia and a strong improvement in the ratios for Newfoundland and Labrador, Ontario, Manitoba, Saskatchewan, the Yukon and Northwest Territories. No improvements were noted in New Brunswick or Nunavut.

Interestingly, despite the better concordance due to the lagging of the data of quarterly estimates for many provinces, the annual in-migration numbers were not necessarily better. In fact they seem to be slightly further apart. While the average difference is the absolute sum of the divergences, the total takes into account the direction of differences.

Clearly, one of the advantages that the CCTB data have over the provincial sources is that the federal program is applied uniformly over all the provinces. This is not to imply that a lag does not exist in the CCTB data, but it is uniform across all jurisdictions. Moreover, CCTB data are directly affected by expenditures of public funds and the program is dutifully administered throughout the year virtually eliminating seasonal effects, with the notable exception in July as new income data come into effect for eligibility. A lag in the health care data is an indication of problems in both the **timeliness** and **consistency** of the data. Judging by the volume of migrants and where they seem to manifest themselves as compared to the CCTB, it is apparent that the lag varies in size and in duration not only from one jurisdiction to another but also at different times during the year.

A much stronger rationale for this shift (or "clumping") of migration numbers in the health care files is probably the nature of the operational cycle in processing for the different provincial/territorial health offices. The file dates are actually the dates that the data were processed.[11] This date is not related to the actual residency date. In some cases, when there is an administrative backlog of unprocessed applications there is an even further skewing or clumping as to when new residents have entered the province/territory health database since the date on the file would normally be the date that the data were processed. [12]

We selected Manitoba as having a similar volume of in-migrants to that measured by the CCTB for the 0 to 17 age group to do our analysis on **accuracy**. Questions were sent to our contact in Manitoba to determine the feasibility of calculating a net migration figure since Manitoba provides us with both new registrations from other provinces plus cancellations (equivalent to out-migrants). It is the only province to do so. But trying to come up with a net migration figure is tricky due to timing issues and, no doubt, incomplete data for out-migrants considering that the lag between event and reporting is likely different. Since their ratio of all health care registrants is close to 1.0, we can assume that their file is fairly close to the CCTB measure and overall **coverage** is good.

Annex E presents a comparison of net migration figures between the Manitoba Health Care registration system and our own estimates based on the CCTB.

Despite an improvement in the overall ratio, there are still many **inconsistencies** with the data. We still have a **reliability** problem due to data gaps resulting from missing monthly data (See **Annex G**) and the lack of data from Quebec. Just recently, we have received some data from Alberta which will be

11. As confirmed by the Health Registration & Vital Statistics Branch of Saskatchewan Health, the data we receive has the month assigned to a new resident based more on an administrative or processing date. This is especially noticeable when there is a backlog to be processed.
12. As previously noted in British Columbia.

included in an Addendum. Furthermore, we are **missing detail** as we are only receiving in-migrant and not out-migrant information by 5-year age groups (in most cases), although Manitoba does provide us with cancellation information, equivalent to out-migrants from the province; however, there is also a **timing issue** as well as a **completeness** issue with this Manitoba data as stated earlier.

4. Conclusion and recommendations

At the beginning of this report, we listed what criteria were needed for a data source to be feasible or viable as a proxy for estimating inter-provincial net migration (Table 1).

An obvious and serious problem in the use of provincial health records has to do with the lag effect – designation of which month for the provinces and territories to put data into is not necessarily the same time as when new residents had arrived in the province or territory. The month assigned to the new resident may relate to the date that they were eligible (normally 3 months after arrival), or based on processing periods (e.g. British Columbia in October and November 2005). To re-iterate, when determining time frames for when people move into another province or territory, the utilization of provincial/territorial administrative data makes it quite difficult to determine that time line since the dates on files normally correspond to the date data have been processed and not a reflection of when people have arrived.

Annex F provides a concrete example of the inconsistent, variable, erratic and unpredictable lag effect between processing, enrolment, eligibility and arrival dates using the Prince Edward Island micro-data for new residents. The enrolment processing periods used are April 2006 and March and April 2007.

This lag effect phenomenon is also evident in the greater-than-one ratios found with the quarterly numbers – a large influx of new residents in provinces in the summer months mean that more data have to be processed which may cause a backlog and not be processed at the same time as people applying for health cards who came from another province or territory. Processing maybe done at a later date especially with data entry staff going on summer vacation; hence, the ratio greater-than-one for the October to December period when new registrants are less and there is time to enter in the backlog of records (as what had happened in British Columbia in 2005). This pattern is, on the whole, consistent if one were to examine those ratios with a value over 1.0 in Table 5. As well, there are those who are new to a province/territory but do not bother getting a health card so we would have no record that they are there unless they have a reason to seek medical attention and are discovered to not have a valid card.

The critical detail of out-migration is not available. Manitoba does give us cancellations (equivalent to out-migrants) but they are not complete and would not correspond exactly with the timing for the in-migrants (in order to calculate net migration).

Most provinces (except for Quebec) and territories provide reports to each other as to the number of new residents who had arrived into their province/territory from other provinces/territories. It may prove useful to tap into this source to get a measure of out migration. However, the timing there is once more an issue when looking at sub-annual data and trying to calculate net migration figures.

Based on this present analysis, it would not be feasible or viable to substitute the provincial and territorial health registration records for our present data sources at this time. As was stated by Rémillard,

> *« it should be kept in mind that the health insurance file is basically an administrative file and not a population register. It is designed to meet certain needs which are not primarily demographic in nature.*[13] …
>
> *For the health insurance files to be fully usable, it will be necessary for the players involved to agree on definitions, the population covered, standards, the format of the files, and procedures. Such agreements are not easy to conclude, especially in fields that are under provincial jurisdiction* [14]*»*

Progress has been made (e.g. more provinces and territories are now providing us with data) but there are still gaps in **coverage**, **completeness**, **consistency**, **timeliness**, **reliability**, **details**, **uniformity** and **accuracy**.

As stated earlier, it would also be useful to check the quality of our population estimates through having access or a link to all of the provincial/territorial health care registrations on a monthly basis.

Another useful piece of information on the health care registration file would be a variable indicating when a resident first arrived in the province or territory.

These Medicare data though can be used for data quality evaluation but not as a replacement for the CCTB.

To summarize the criteria and the issues:

Coverage:

- **Eligibility:** Many provinces exclude specific populations and the exceptions vary from one province to the next.
- **Completeness**: The level of completeness varies from under to over estimation from one province to the next. We do not yet receive data from all jurisdictions.

Timeliness:

- Difficult to determine the lag factor (e.g. Prince Edward Island [**Annex F**] as a concrete example of month of enrolment versus month of arrival versus month of processing).
- Some data very late in arriving (e.g. Yukon).

13. Rémillard, p. 31.
14. Rémillard, pp. 31-32.

Reliability:

- Some provinces report 0 migrations on a monthly basis, rendering its quality dubious.
- Some administrative processes lead to "clumping" as registrants.
- The lag effect on the measurement of mobility and Health Care file registrations varies and although it appears to be 3 months it is not accurately measurable (see **Annex F**).
- Some provinces, by their eligibility rules, delay the actual registration of migrants way beyond the 3 month lag.

Level of detail:

- The serious lack of out-migration data make it not a suitable replacement for the CCTB.
- When we have out-migration figures as in the case of Manitoba the results are not of good quality.
- Unknown origin of new residents for Saskatchewan results in undercoverage of inter-provincial in-migrants.

Lack of individual ages makes it difficult to compare with the CCTB to get specialized cohort groups (e.g. 0 to 17).

Notes:

1. The ratio is calculated by dividing the Medicare number over the estimate number.

Medicare figures have been lagged by three months. For example, the July to September numbers are actually the October to December figures for the provincial medicare data (Time = -3 months). April to June 2006 is missing for the Medicare records as the July to September 2006 had not been originally included in the tables.

CCTB: Canada Child Tax Benefit

Annex B2

Table B2
Summary table comparing the lagged and non-lagged results of quarterly in-migration counting the number of quarters with a ratio of 1.0 and ratio greater than 1.0 based on Annex B1

Province / territory	Ratio = 1		Ratio > 1		Quarters where ratio = 1 after lag while for same quarter, ratio was > 1 before lag	Quarters where ratio ≠ 1 after lag while for same quarter, ratio was = 1 before lag
	Same quarters	Medicare lagged by -3 months	Same quarters	Medicare lagged by -3 months

Nunavut	1	0	2	1	0	1
Canada	1	6	4	2	2	1

Annex C

Undercoverage in the New Brunswick health care registration file

Despite these large differences in in-migrant figures, if one were to measure the overall coverage of all health care registrations from New Brunswick and compare it with Demography Division's total population estimates, the coverage ratio is between 0.98 and 0.99.[15] (See Table 2). This fact leads us to believe that the problem may lie in how New Brunswick defines a new resident to the province and leads to a **coverage, completeness** and **consistency** problem.

As stated earlier, the New Brunswick in-migrant figures are consistently below our own estimates. After several e-mails, phone calls and face-to-face contact with our New Brunswick contact over several months to try and find out why the New Brunswick numbers are always so much lower, we received the answer that they had found that we were not getting accurate information. They would be able to provide us with the correct information.[16]

New Brunswick needed to make a few changes to their batch processing of the new/returning residents in order to get the system to provide us with the correct data which would start with the March 2007 figures.

In looking at old batch processing documents, there were 2 separate systems – one for new residents and one for returning residents.[17] Though we were not specifically told what the problem was, given what we had found, it could be that we were only getting the new residents and not the returning residents. We wanted to have both new and returning residents.

We recently received the adjusted figures for March 2007 from the New Brunswick Department of Health. When we compare our preliminary March numbers for the 0 to 17 age group to New Brunswick's figures we have a ratio of 0.55. This figure is better than the 0.22 ratio of March 2006 or the 0.31 and 0.49 ratio for respectively January and February 2007. This March 2007 ratio is still on the low side. We will have to wait for future months to see whether the New Brunswick Medicare figures are closer to our estimates of the 0 to 17 cohort.

We were also given starting in March 2007 a quarterly report of "Adjusted New Brunswick Residents by Age Group and Sex by Region of Residence Registered with Medicare". Unfortunately, at this stage, we do not know how this second report of total registered relates to the monthly in-migrant report as they are 2 different populations. Therefore at this time, we will not be using this second report.

15. The New Brunswick health card registration numbers were obtained from information that New Brunswick supplied to Health Canada under the Canada Health Act and from New Brunswick's own Annual Report on Health (the latter source for 2005 and 2006).
16. E-mail from the New Brunswick Department of Health.
17. The New Brunswick Medicare application for registration form has the following categories to be checked off: New resident and returning resident. The form also asks for one's New Brunswick Medicare number for returning residents (See **Annex H**).

Total	3,845	3,693	1.0	4,433	3,957	0.9	-588	-264
2005/2006								
July to September	1,171	1,117	1.0	1,805	602	0.3	-634	515
October to December	568	852	1.5	986	808	0.8	-418	44
January to March	893	614	0.7	1,188	2,451	2.1	-295	-1,837
April to June	987	642	0.7	1,399	874	0.6	-412	-232
Total	3,619	3,225	0.9	5,378	4,735	0.9	-1,759	-1,510

Note:
1. The ratio is calculated by dividing the Medicare number over the estimate number.

The ratio of Manitoba's cancellations (=out-migrants) based on their health care files and compared to our own estimates of out migration varies greatly: 0.3 in July to September 2004 to 2.1 in January to March 2006.

Net migration figures based on the Manitoba records vary from 44 in October to December 2005 to -1,837 in January to March 2006.

In 7 cases, the quarterly net migration direction differs between Manitoba and the Demography Division estimates.

As stated earlier, into which month or quarter to put these provincially-based in- and, especially, out-migration figures into is based more on administrative or processing dates as opposed to when people actually arrived or left (See **Annex F**).

Annex F

Table F1
Prince Edward Island inter-provincial in-migrant processing, eligibility and arrival months and lag problems

Period	Processing Month[2]					
	March 2007			April 2007		
	Month eligible	Month arrived[1]	Arrived in each month	Month eligible	Month arrived[1]	Arrived in each month
	Number		%	Number		%
August 2006	2	16	8.2	2	…	…
September 2006	4	15	7.7	2	16	11.0
October 2006	20	16	8.2	1	3	2.1
November 2006	16	18	9.3	15	12	8.2
December 2006	15	18	9.3	16	10	6.8
January 2007	16	85	43.8	3	20	13.7
February 2007	18	0	0.0	12	57	39.0
March 2007	18	0	0.0	10	8	5.5
April 2007	85	0	0.0	20	0	0.0
May 2007	…	…	…	57	0	0.0
June 2007	…	…	…	8	0	0.0

Notes:

1. Since there is a 3-month waiting period for eligibility, the arrival month would be 3 months prior to eligibility month and the eligibility month is normally the month after the processing month (when health cards are issued) if one applies the month one arrives in P.E.I.
2. For the respective processing months of March and April 2007: 1) April and May 2007 should be the eligibility months given that requests are processed 2 to 3 weeks prior to the eligibility month; 2) January and February 2007 should be the arrival months given the 3-month waiting period, and 3) October and November 2006 should be the cut-off months for backdating the length of time spent in Prince Edward Island prior to enrolling.

For the April 2007 processing month, one data point with an eligibility month of November 2007 was transferred to November 2006 as was probably a keying error.

The idea of getting a better fit should we lag the data by 3 months (due to the 3-month waiting or eligibility period) can be tested using the micro-data from Prince Edward Island for the March and April 2007 processing periods. In speaking with a representative from Prince Edward Island Health, it was revealed that data are processed 2 to 3 weeks prior to the date that someone is eligible for health coverage. Therefore, the monthly data we receive reflects the processing of the application form and not necessarily the month of enrolment.

As well, normally, eligibility months go back for a maximum of 6 months prior to the processing month even if someone had been in the province prior to the 6 months from the processing periods (there are some exceptions though). This is why there are a large number of people eligible in October 2006 (for the processing month of March 2007) and November 2006 (for the April 2007 processing month).

Ideally, if everyone had applied 3 months before they are eligible then the month of eligibility would be one month after the processing month, (for example, for the April 2007 data, the eligibility month would be May 2007). In the case of an April 2007 processing month with an eligibility month of May 2007 then people would have arrived in February 2007.

This Annex shows that for the March 2007 processing month, 44% of the new residents was eligible in April 2007 and for the April processing month 39% were eligible in May 2007. Therefore those processed in March would have arrived in February 2007 and those processed in April 2007 would have arrived in January 2007. As well, for April, 8 people had an eligibility period of June 2007 so would have arrived in March 2007.

But this also means that for the March processing month, 56% of the people arrived prior to January 2007 and for April 2007, 66% arrived prior to February 2007. These people are not new residents as of March or April 2007 or arrived in January or February 2007 but that is how we have interpreted these data and that of other provinces.

It is safe to assume that if the eligibility month is after the processing month then the new residents had arrived at least 2 months prior to the processing month. For the eligibility months before the processing month it is difficult to say what is going on.[18]

18. Anecdotally, there was a situation with an applicant for the April 2006 processing month. She had an eligibility month of November 2005. In checking her application, it was revealed that she came to Prince Edward Island as a student in 2002 from Nova Scotia. While a student, her home province covered her health care. She then had graduated in May 2004 and probably stayed in Prince Edward Island. She would then have had a 3 month waiting period before being eligible for Prince Edward Island health care coverage. Had she applied after she had graduated then she would have been covered in August 2004. She probably had actually applied in April 2006 so the system backdated her eligibility date to no sooner than November 2005 since it normally only goes back 6 months from the processing month. Therefore in looking at just the April 2006 printout, we would have considered her to have arrived in Prince Edward Island in February 2006 while she had actually migrated from Nova Scotia in 2002.

APPLICATION FOR NEWFOUNDLAND & LABRADOR HEALTH CARE COVERAGE

Please read the back of this Application for important registration information

FOR OFFICE USE ONLY
Elig. Dt. Term. Dt.

SECTION A **ANSWER ALL OF THE FOLLOWING QUESTIONS (*please print*)**

1. Have you or your dependents been registered with MCP before? ☐ **Yes** ☐ **No**
   If YES, please list on a separate sheet the previous MCP numbers (if available) of all persons to be registered.
2. When did you arrive in Newfoundland & Labrador? _____
3. Why did you move to Newfoundland & Labrador? ☐ **Work** ☐ **Study** ☐ **Other** _____
4. How long do you intend to stay in Newfoundland & Labrador? _____
5. Are any of the people being registered a member of: ☐ **Canadian Armed Forces** ☐ **NATO Forces** ☐ **RCMP**
   (Check one - if not applicable, leave blank)
6. Have all of your dependents moved with you to Newfoundland & Labrador? ☐ **Yes** ☐ **No**
   If NO, please explain _____
7. Are you moving to Newfoundland & Labrador from another part of Canada? ☐ **Yes** ☐ **No**
   If YES, which province or territory? _____
8. Are you moving to Newfoundland & Labrador from outside Canada? ☐ **Yes** ☐ **No**
   If YES, which country? _____

SECTION B **MAILING ADDRESS**

Street/P.O. Box		City/Town
Province	Postal Code	Telephone Number

SECTION C **MARITAL STATUS**

Single ☐	Married ☐	Widowed ☐	Divorced ☐	Separated ☐	Common Law ☐

SECTION D **LIST BELOW YOUR NAME AND THE NAMES OF ALL PERSONS REGISTERING FOR HEALTH CARE COVERAGE**
(attach a separate sheet if more space required)

Surname	All Given Names	Maiden Name (if applicable)	Sex (M/F)	Birth Date (YY/MM/DD)	Previous Province Health Insurance No.

SECTION E **DECLARATION**
(It is an offense to give false information for the purpose of obtaining coverage under the Newfoundland & Labrador Medical Care Plan)

I hereby declare that the information given is correct and the person(s) listed on this form are residents of Newfoundland & Labrador.

Signature Date

APPLICATION FOR NEWFOUNDLAND & LABRADOR HEALTH CARE COVERAGE

Please print and use a blue or black pen.

Clear Form

A. Personal information

Last name	First name	Middle name	Sex
			☐ M ☐ F

Date of birth (yyyy mm dd)	Official language preference?	Have you ever had an Ontario Health Number?	If yes, what was the number?
	☐ English ☐ French	☐ yes ☐ no	

Home telephone no.		Work or other telephone no.
( )		( ) ext.

Mailing address	Apartment	Street number and name, or P.O. box number, R.R., General Delivery

City	Province	Postal code	Country

Residence address (if different from above)	Apartment	Street number and name, or lot, concession, and township

City	Province	Postal code	Country	Date moved to this address (yyyy mm dd)
	ON		CANADA	

B. New or returning residents of Ontario

Where did you move from? *(Apartment number, street number and name)*	City

Province/State	Country	When did you leave the above address?

When did you arrive to Ontario?	When did you take up permanent residence in Ontario? (yyyy mm dd)	How long do you plan to live in Ontario?
		☐ permanently ☐ temporarily

If you moved from another part of Canada, were you covered by a government health plan?	If *yes*, what was your health number?
☐ yes ☐ no	

Are you a Canadian citizen returning to Canada?	Are you an immigrant returning to Canada?	Are you a new immigrant?
☐ yes ☐ no	☐ yes ☐ no	☐ yes ☐ no

Have you recently left the Canadian Forces, RCMP?	Have you recently been released from a Federal penitentiary?	Are you a student?
☐ no ☐ yes *(date of discharge)* yyyy / mm / dd	☐ no ☐ yes *(date of release)* yyyy / mm / dd	☐ yes ☐ no

C. Citizenship or Immigration status

☐ Canadian ☐ Indian (under the Indian Act) ☐ Landed immigrant ☐ Convention refugee ☐ Other *(specify)* _____

D. Agreement

I confirm that:

- I make and intend to continue making my permanent and principal home in Ontario.
- I will be physically present in Ontario for at least 5 months (153 days) in any 12-month period.
- If I am a new applicant for health coverage in Canada or if I have had a break in health coverage in Canada, I must not be absent from Ontario for more than 30 days within the first 183 days immediately after the date residency is established in Ontario.
- The information I have given in this application, and in the documents I have provided, is true and accurate.

I understand that:

- If there is a change in my name, address, citizenship or immigration status, I will tell the Ministry of Health and Long-Term Care within 30 days.
- The Ministry of Health and Long-Term Care may check my resident status and any information I have given in this form and in the documents I have provided.
- For verification this information may be collected from, and disclosed to, government and non-government organizations, if the law allows it.
- It is an offence to knowingly provide false information in relation to this application.

Alberta (New application form on-line as of September 21, 2007)

Alberta Health and Wellness

Application for Alberta Health Care Insurance Plan Coverage

Insurance Plan Coverage Information

Who should apply?

All **permanent residents** of Alberta must register themselves and their **dependants** with the Alberta Health Care Insurance Plan.

Who is considered a permanent Alberta resident?

A permanent Alberta resident is a person who has the legal right to remain in Canada, makes Alberta his/her permanent home, and is present in Alberta at least 6 months a year.

Who is a dependant?

A dependant includes:

- an Alberta resident who is the spouse/ partner of the applicant;
- a child who is under 21, single and wholly dependent on the applicant;
- a single child over 21 years old who is wholly dependent because of physical or mental disability; or
- a child who is 21-25, single, and attending school or university full time.

When does coverage start?

If you are moving to Alberta from within Canada you are eligible for coverage on the 1st day of the 3rd month following the date you establish permanent residency here.
If you are moving from outside Canada you are eligible for coverage on the date you arrive.

Do I have to pay for coverage?

Yes. In Alberta, we charge monthly premiums for Alberta Health Care Insurance Plan coverage. Premiums are billed from the effective date of coverage. Premiums may be submitted directly or by an employer, association or union on behalf of the account holder. Payment is required even if you do not receive health care services.

Seniors (65+) and dependants covered under their account do not have to pay Alberta Health Care Insurance Plan premiums. Seniors are required to present proof of age in order to receive premium-free coverage.

What if I can't afford to pay my monthly premiums?

Premium assistance may be available for Albertans with lower incomes. Contact our office for more information.

For more information, please refer to the enclosed brochure, visit our website at www.health.alberta.ca or contact an Alberta Health and Wellness office (see page 5).

Required Documentation

In order to process your application for Alberta Health Care Insurance Plan coverage, you must include **photocopies** *(front and back, if applicable)* of documents proving your **Alberta residency**, **identity**, and **legal entitlement to be in Canada**. Examples of these documents are listed below. **If you do not submit these documents, your application can not be processed. Please do not send originals as we can not guarantee their safe return.**

Alberta residency	Government issued photo identification	Legal entitlement to be in Canada
One of the following in either applicant's or spouse/partner's name. • Current Alberta driver's licence • Current Alberta registries ID Card • Current utility bills for an Alberta residence	• Canadian/Non-Canadian passport • Canadian citizenship card • Permanent Resident Card • Federal identification card • Current Alberta/provincial/ territorial driver's licence	• Canadian passport • Canadian citizenship card • Canadian birth certificate • Permanent Resident Card • Canada entry document • Nexus card • Baptisimal certificate

Section C - Dependant personal information

Important: If your dependant is not a Canadian citizen, please provide a **copy of their Canada entry document**.

See information page for more details

First dependant's information

Title (e.g. Mr, Miss, Ms) | For Office Use Only

My dependant's last name is

My dependant's first name is

My dependant's middle name is

My dependant's birthdate is Y Y Y Y | M M | D D ☐ Male ☐ Female

Please provide the Personal Health Number of your dependant (if previously registered in Alberta)

Second dependant's information

Title (e.g. Mr, Miss, Ms) | For Office Use Only

My dependant's last name is

My dependant's first name is

My dependant's middle name is

My dependant's birthdate is Y Y Y Y | M M | D D ☐ Male ☐ Female

Please provide the Personal Health Number of your dependant (if previously registered in Alberta)

First dependant's citizenship

My dependant is a:

- ☐ Canadian citizen
- ☐ Permanent resident
- ☐ Other *(specify status)*

Second dependant's citizenship

My dependant is a:

- ☐ Canadian citizen
- ☐ Permanent resident
- ☐ Other *(specify status)*

My first dependant

Is a: ☐ new Alberta resident ☐ returning Alberta resident

- who established permanent residence in Alberta on: Y Y Y Y | M M | D D
- who arrived in Canada on: *(if applicable)* Y Y Y Y | M M | D D
- who intends to live in Alberta for the next six months or longer: ☐ Yes ☐ No
  If you answered NO, explain and state how long he/she intends to stay in Alberta.

My dependant's

- Last place of residence was:
- Previous province/territory medical plan number was:

My second dependant

Is a: ☐ new Alberta resident ☐ returning Alberta resident

- who established permanent residence in Alberta on: Y Y Y Y | M M | D D
- who arrived in Canada on: *(if applicable)* Y Y Y Y | M M | D D
- who intends to live in Alberta for the next six months or longer: ☐ Yes ☐ No
  If you answered NO, explain and state how long he/she intends to stay in Alberta.

My dependant's

- Last place of residence was:
- Previous province/territory medical plan number was:

If you have more than two dependants, please proceed to page 4.
If you do not have any more dependants, please proceed to page 5, Section D.

Page 3

Section C - Dependant personal information *(continued)*

See information page for more details

Third dependant's information

Title (e.g. Mr, Miss, Ms) | For Office Use Only

My dependant's last name is

My dependant's first name is

My dependant's middle name is

My dependant's birthdate is Y Y Y Y | M M | D D ☐ Male ☐ Female

Please provide the Personal Health Number of your dependant (if previously registered in Alberta)

Fourth dependant's information

Title (e.g. Mr, Miss, Ms) | For Office Use Only

My dependant's last name is

My dependant's first name is

My dependant's middle name is

My dependant's birthdate is Y Y Y Y | M M | D D ☐ Male ☐ Female

Please provide the Personal Health Number of your dependant (if previously registered in Alberta)

Third dependant's citizenship

My dependant is a:

- ☐ Canadian citizen
- ☐ Permanent resident
- ☐ Other *(specify status)*

Fourth dependant's citizenship

My dependant is a:

- ☐ Canadian citizen
- ☐ Permanent resident
- ☐ Other *(specify status)*

My third dependant

Is a: ☐ new Alberta resident ☐ returning Alberta resident

- who established permanent residence in Alberta on: Y Y Y Y | M M | D D
- who arrived in Canada on: *(if applicable)* Y Y Y Y | M M | D D
- who intends to live in Alberta for the next six months or longer: ☐ Yes ☐ No
  If you answered NO, explain and state how long he/she intends to stay in Alberta.

My dependant's

- Last place of residence was:
- Previous province/territory medical plan number was:

My fourth dependant

Is a: ☐ new Alberta resident ☐ returning Alberta resident

- who established permanent residence in Alberta on: Y Y Y Y | M M | D D
- who arrived in Canada on: *(if applicable)* Y Y Y Y | M M | D D
- who intends to live in Alberta for the next six months or longer: ☐ Yes ☐ No
  If you answered NO, explain and state how long he/she intends to stay in Alberta.

My dependant's

- Last place of residence was:
- Previous province/territory medical plan number was:

If you have more than four dependants, please list their information on a separate sheet.
If you do not have more than four dependants, please proceed to page 5, Section D.

MEDICAL SERVICES PLAN
APPLICATION FOR ENROLLMENT

Residents of BC are required, by law, to enroll themselves and their dependents with MSP.
Before completing this application, please read **IMPORTANT INFORMATION**, Section 7, on next page.

Personal information on this form is collected under the authority of the *Medicare Protection Act*. The information will be used to determine residency in BC and determine eligibility for provincial health care benefits. If you have any questions about the collection of this information, contact a Health Insurance BC client service representative at the address or telephone numbers shown above. Personal information is protected from unauthorized use and disclosure in accordance with the *Freedom of Information and Protection of Privacy Act* and may be disclosed only as provided by that Act.

1 APPLICANT INFORMATION – *PLEASE PRINT*

LEGAL NAME	FIRST	SECOND	SURNAME

BIRTHDATE MM DD YYYY	GENDER ❑ M ❑ F	HOME PHONE NUMBER ( )	WORK PHONE NUMBER ( )

RESIDENTIAL ADDRESS	POSTAL CODE	MAILING ADDRESS (if different from residential address)	POSTAL CODE

2 RESIDENCE AND CITIZENSHIP/IMMIGRATION INFORMATION

RESIDENT means a person who is a citizen of Canada or is lawfully admitted to Canada for permanent residence, who makes his or her home in British Columbia, and is physically present in British Columbia at least 6 months in a calendar year, and includes a person who is deemed under the regulations to be a resident but does not include a tourist or visitor to British Columbia.

APPLICATION FOR HEALTH CARE

BEFORE COMPLETING THIS APPLICATION, PLEASE READ **IMPORTANT INFORMATION,** SECTION 5.

NOTE: This personal information is being collected under the authority of the *Medical Care Act*. Its disclosure is governed by the privacy provisions of the *Access to Information and Protection of Privacy Act*. If you have any questions about the collection of this information, contact the Department of Health and Social Services at the address listed above.

Section 1. APPLICANT INFORMATION - *PLEASE PRINT*

Reason for the Application: ❒ New to the NWT ❒ Returning to the NWT ❒ Newborn

Legal Name	Surname	First Name	Middle Name(s)

Birthdate (dd/mm/yyyy)	Gender: ❒ Female ❒ Male
Residential/Street Address	Mailing Address (if different from residential/street address)
City/Town/Village	City/Town/Village
Country / Postal Code	Country / Postal Code
Home Phone No. ( )	Work Phone No. ( )

Section 2. IF APPLICATION IS FOR NEWBORN - *PLEASE PRINT* - ❒ Biological ❒ Adoptive

Parent - Surname	Parent - First Name	Parent - Middle Name(s)
Parent - Health Care Number		Birthdate of Parent (dd/mm/yyyy)

Section 3. RESIDENCE AND CITIZENSHIP/IMMIGRATION INFORMATION

RESIDENT means a person who is a citizen of Canada or is lawfully admitted to Canada for permanent residence, who makes his or her home in the NWT, and includes a person who is deemed under legislation to be a resident but does not include a tourist, transient, visitor, or temporary or seasonal worker.

❒ **CANADIAN CITIZEN (CC)** Attach photocopy of Canadian birth certificate or Canadian citizenship card.

❒ **ABORIGINAL STATUS (AS)** Attach photocopy of Indian status card or letter from Métis/Inuit/Inuvialuit organization. (Inuit and Inuvialuit letter must include Inuit N number)

❒ **LANDED IMMIGRANT (LI)** Attach photocopy of record of landing.

❒ **OTHER** Attach photocopy of employment/student authorization, Minister's permit, etc.

Aboriginal Status: ❒ Status Indian ❒ Métis ❒ Inuit ❒ Inuvialuit ❒ Indigenous Métis

Where did you move from? (street number and name)	City	Province/State	Postal Code
When did you leave the above address? (dd/mm/yyyy)	When did you arrive in the NWT? (dd/mm/yyyy)	When did you take up permanent residence in the NWT? (dd/mm/yyyy)	
How long do you plan on living in the NWT? ❒ Permanently (over a year) ❒ Temporarily (under a year)	Were you covered by another government health care plan? ❒ Yes ❒ No	If yes, what was your health number (include Province/Territory)	
Have you recently left the Canadian Forces, RCMP? (Copy of discharge papers must be attached) ❒ Yes ❒ No Date of discharge (dd/mm/yyyy)	Have you recently been released from a federal penitentiary? (Copy of release papers must be attached) ❒ Yes ❒ No Date of release (dd/mm/yyyy)		

Section 4. SPOUSE/DEPENDANT INFORMATION - PLEASE PRINT If you have more than five dependants, please list the information on a separate sheet.

SPOUSE means a resident who is either married to or living in a marriage-like relationship with the applicant and may be of the same gender as the applicant. **CHILD** means a resident who is the legal ward or child of the applicant, is supported by the applicant, is neither married nor living in a marriage-like relationship, and is either age 18 or younger or age 19-21 and attending school or university full-time. NWT Health Services Administration will confirm with previous jurisdiction that child is still registered as your dependent.

PHOTOCOPIES OF CURRENT CITIZENSHIP/IMMIGRATION DOCUMENTS MUST BE ATTACHED.
USE LEGAL NAMES WHEN COMPLETING THIS FORM.

Surname	Given Name(s) First and Middle	Gender M or F	Date of Birth (dd/mm/yyyy)	Citizenship/Immigration CC, AS, LI, Other	Aboriginal Status 1. Status Indian 2. Métis 3. Inuit 4. Inuvialuit 5. Indigenous Métis

Date of Arrival of Spouse:

Section 5. IMPORTANT INFORMATION

- **IDENTIFICATION:** You must send with your application photocopies of **birth certificate, Canadian citizenship** or **immigration status for all** persons listed. **Eligibility** cannot be determined without this document.
- **RESIDENCY:** A person must be a resident of the NWT to qualify for Territorial health care benefits, your current residential address is required. An application received with only a PO Box or General Delivery address will not be processed until your residential address is provided. Please include a copy of one of the following: Rent receipts, lease agreement, letter from private landlord or confirmation from a financial institution that a mortgage for local residential property is being held. Utility receipts such as: oil, power, water, property tax and/or telephone bills. Confirmation from Revenue Canada that you filed a NWT Income Tax Return (your income tax return). A letter from your employer verifying start and end dates of employment.
- **EFFECTIVE DATE OF BENEFITS:** New and returning residents must complete a waiting period before health care benefits can begin. Generally, this period consists of the balance of the month of arrival in the NWT, plus two months.
- You must notify your previous province's Health Care Plan of your effective date of coverage with the NWT Health Care Plan and/or request an extension of coverage, if applicable.
- Please keep in mind that should you have any changes to your name, status, address, etc., after you send in your application, you are to contact our office immediately to inform us of these changes or pick up the appropriate forms at any health facility located throughout the NWT.
- **OUT-OF-TERRITORY STUDENTS:** If studying outside the NWT, the absence must be temporary and solely for the purpose of attending school or university. Proof of school registration as a student for the current term is required to be sent with your Temporary Absence Form. (available at the address listed above)

"I (We) hereby certify that I am a permanent resident of the Northwest Territories and I (we) understand that it is an offence to give false or misleading information in the application form and by signing this form I am (we are) authorizing health services administration to verify or confirm the information and documentation contained with this application. Note: Any spouse/dependants 19 years of age and over must also sign this application form."

Application for Nunavut Health Care Coverage

Important: Please read the back of this application for more registration information

Applicants moving to Nunavut from within Canada must attach a clear copy of the following to this form; Birth Certificate & Health Care Card (from the Province / Territory you are currently registered in)

You may also be requested to provide: A Valid Canadian Passport, Immigration Documents and/or a Land Claims Beneficiary Card

Applicants moving to Nunavut from outside Canada must attach a copy of official Immigration Documents. (Readable photocopies of originals will be accepted)

There are supplementary health benefit programs available. For more information contact your local health center or the Health Insurance Programs office listed on the back of this application form.

Important: **Please fill out application in English**

A: Name of Person to be Registered for Health Coverage (must be a permanent resident) In the Ethnicity box enter one of the following numbers 1 = Inuit 2 = Registered Indian 3 = All Others

(Please Print) Surname	Given Name(s)	Sex	Ethnicity	Birth Date d/m/y	Prov Prov	Previous Health Care Plan Number

If you entered #2 Registered Indian, please provide a copy of your band card or a letter from the Department of Indian and Northern Affairs.

B: Mailing Address & Contact Numbers

Mailing Address: PO Box / Community / Territory / Postal Code

e-mail Address	Home Phone	Employer Name & Phone Number

C: To avoid delays, please answer ALL of the following questions (Please Print)

How long do you plan to live in Nunavut? ☐ Permanently ☐ Temporarily until _____ (d/m/y)

Have you moved to Nunavut from outside Canada? ☐ YES ☐ NO (If YES, refer to Section **E** for more details)

When did you arrive in Nunavut? _____ (d/m/y)

Reason for move to Nunavut ☐ WORK ☐ STUDY ☐ OTHER _____

Have all your immediate family members moved with you to Nunavut? ☐ YES ☐ NO If NO, Please explain (see Section G) _____

Have you recently left one of the following; Canadian Armed Forces - RCMP - Federal Penitentiary? ☐ YES ☐ NO If YES, date of discharge _____ (d/m/y)

Have you ever been registered for Nunavut Health Care coverage before? ☐ YES ☐ NO If YES, what year? _____

D: Declaration

I declare that the information given is correct. **It is an offence to give false information for the purposes of obtaining coverage under the Nunavut Health Care Plan.**

▼ Check One (If applicant is under 19 years of age, this form must be signed by a parent or legal guardian.

☐ Applicant

☐ Parent

☐ Legal Guardian Please Print Name _____ Signature _____ Date _____

E: Required Immigration Documents

Immigration documents are required for each individual applying for Nunavut Health Care. Other documentation may be requested for verification purposes.
Good quality photocopies will be accepted.

F: Individuals Not Eligible for Nunavut Health Coverage

- Tourists, Transients, and Visitors
- Temporary, Term and Seasonal Positions - A position of employment of less than 12 consecutive months.
- Members of the RCMP, Canadian Armed Forces and/or NATO Forces
- Inmates - Of a Federal Penitentiary
- Canadian Students - Attending an educational institute in Nunavut but not intending to establish a permanent residency
- Students - From outside Canada holding a Visa of less than 12 months
- Certified Refugees or Refugees Claimants - Health coverage provided by Federal Government.
- Individuals holding an Employment Visa of less than 12 months
- Individuals holding a Minister's Permit (exceptions may apply)

If the applicant accepts temporary or term employment in Nunavut, the home province must be notified. Home province coverage will continue for up to one year.

G: Families Not Moving Together

In the case of a permanent move, where one spouse moves from Province A to Nunavut in advance of the rest of the family, the spouse having moved, will be looked on as temporarily absent from Province A until the rest of the family arrives (without exceeding a period of twelve months).
In the case of a dependant (child) remaining in Province A for educational purposes and both parents have moved to Nunavut, the dependant's residence for health insurance purposes goes with the parents' residence. Documentation must be provided that validates the claim that the dependant is attending an educational facility.

H: Changes to Personal Information

It is important that the Health Care Registrations Department be notified of any changes to name, ethnicity and/or address, including temporary residency outside of Nunavut.
A "Request for Change" form (Green) may be obtained from a Health Center, Public Health office or Hospital located in Nunavut.

I: Verification of Ethnicity

Individuals who indicate Inuit or Registered Indian ethnicity must provide in the case of Inuit, a Beneficiary Card, and in the case of Registered Indians, a DIAND card.
If these documents cannot be provided, the applicant will be registered as "Non-Aboriginal" until the Registrations Department has been notified. Failure to register as Inuit or Registered Indian may result in the loss of Non-Insured Health Benefits, therefore it is important to provide the necessary documentation with the application.

J: Effective Date of Health Care Coverage

Health coverage may become effective on the 1st day of the 3rd month of your arrival in Nunavut providing all documentation has been received.

Send the completed application or direct any inquiries to the address listed below

Annex I

Follow-up document

Alberta health care registrations and inter-provincial migration

Starting with January 2007 data, Alberta is now producing monthly migration estimates. This follow-up document analyzes these data which were received after the original research was done and refers to a different time period from what the main paper had been analyzing. Unfortunately, there is no age group breakdown and there is a large proportion of unknowns (domestic versus foreign migrations) category:

Table I1
Unknown origin of migration data in the Alberta health care registration file monthly/quarterly for total age group

Period	Total	Domestic	Foreign	Unknown	Total	Domestic	Foreign	Unknown
	number				% of total			
In-migrants								
2007 Q1								
January	8,900	6,915	35	1,950	100	77.7	0.4	21.9
February	6,560	4,410	40	2,110	100	67.2	0.6	32.2
March	8,095	5,575	125	2,395	100	68.9	1.5	29.6
Total	23,555	16,900	200	6,455	100	71.7	0.8	27.4
2007 Q2								
April	5,470	3,495	50	1,925	100	63.9	0.9	35.2
May	7,200	4,505	40	2,655	100	62.6	0.6	36.9
June	6,900	3,640	150	3,110	100	52.8	2.2	45.1

As stated and what is evident from the above table, there is a large proportion of **unknowns** in the in-migrant population (between 22% and 45%) and the out-migrant population (from 28% to 63%). Once again these **unknowns** make it very difficult to **accurately** measure inter-provincial migration flows.

Alberta does provide us with both in- and out-migrants but there is the **timing**/processing date issue with respect to net migration figures as discussed previously.

It was mentioned in the feasibility paper in a table on **accuracy** that special provincial/territorial rules may affect the measurement of migration. In the case of Alberta, there may be an over-estimation of Albertans living physically in Alberta due to these regulations:

When an Albertan leaves the province for another part of Canada but intends to return to Alberta within 12 months, he/she maintains his/her Alberta health coverage. If the Albertan leaves the province for longer than 12 months but intends to return to live permanently, he/she can still be covered for up to 2 years for travel, personal visits or educational leave (sabbatical); up to 4 years for work, business or missionary service; or the duration of time that the resident is enrolled as a full-time student at an accredited educational institute.[19]

In our estimates, we do not consider as migrants persons moving from one province to the next for educational study purposes.
